

OV51171L8M

Кафемашина с вградена кафемелачка

Инструкция за употреба

Моля, прочетете внимателно следната инструкция, и я запазете за бъдещи справки!

Глава 1: Предпазни мерки за безопасна употреба

Глава 1: Предпазни мерки за безопасна употреба

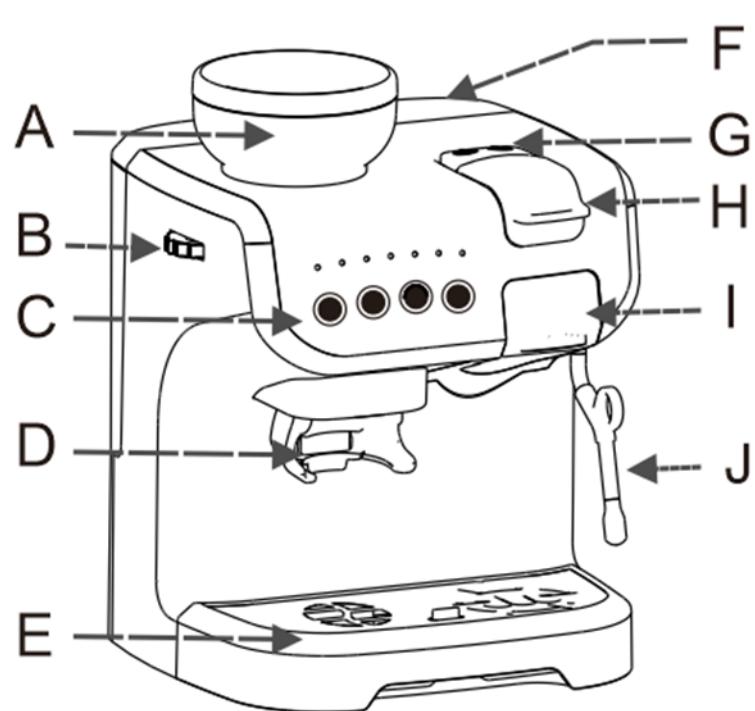

- Прочетете внимателно това ръководство преди употреба и моля, обърнете внимание на следното:
- Уверете се, че машината е изключена, когато е изключена:
- Опасност от токов удар! Не докосвайте щепсела / гнездото / захранването или машината, когато ръцете ви са мокри. Не изключвате захранването

чрез издърпване на захранващия кабел.

- Опасност от попарване! Не местете машината, докато работи!
- Опасност от изгаряне! Не докосвайте горещи части на машината (например части, които кипят вода или части, които отделят вода по време на работа).
- Опасност от попарване! Пазете далеч от пара и водни струи!
- Опасност от изгаряне! Не отваряйте дръжката, докато машината работи
- Опасност от токов удар! Не потапяйте машината, захранващия кабел и включете вода или други течности!
- Уверете се, че машината е изключена и охладена преди почистване или обслужване.
- Преди да се свържете към захранването, проверете дали локалното захранващо напрежение съответства на посоченото напрежение.
- Електрическите уреди не са предназначени за употреба от лица с физически, сетивни или умствени увреждания (включително деца) или от неопитни и необразовани лица, освен ако не са наблюдавани или инструктирани от отговорно лице, отговарящо за тяхната безопасност, а възрастните трябва да инструктират децата да не играят с електрически уреди.
- Не позволяйте на децата да използват този продукт или като играчка.
- Не използвайте продукта, когато щепселт, кабелт или продуктът са повредени. Отидете в сервизен център за проверка възможно най-скоро, не променяйте, разглобявайте или ремонтирайте сами.
- Този продукт е само за домашна употреба и не може да се използва за никакви други цели.
- Моля, използвайте продукта върху гладка, топлоустойчива повърхност и не го използвайте във влажна или прашна среда. Не използвайте продукта в близост до открит пламък, топлина или пръски вода, за да избегнете инциденти.
- Когато продуктът изглежда необичаен, спрете да го използвате незабавно.
- Не покривайте горния капак, докато продуктът е в експлоатация.
- Когато продуктът работи, обърнете внимание на водната паря, не поставяйте лицето си близо до изхода на водата, за да не направите изгарянията
- Не премествайте продукта, докато е в експлоатация, за да избегнете инциденти.
- Леки вибрации ще се появят, когато продуктът е в експлоатация, което води до леко движение на чашата за кафе, което е нормално.
- Не отваряйте дръжката, докато продуктът работи
- Не поставяйте пръстите си или други предмети в чашата за варене, за да избегнете инциденти!
- Съхранявайте продукта, кордата и капсулите кафе на място, недостъпно за деца.
- Не пълнете резервоара с гореща вода.
- Не изключвате чрез издърпване на захранващия кабел.
- Не докосвайте захранващия кабел с мокри ръце
- Не извършвайте разглобяване на продукта
- Продуктът трябва да бъде изключен или изключен преди почистване.
- Уредите не трябва да се мият директно във вода

- Не го използвайте на открито, избягвайте да се нагрява продуктът, пряка слънчева светлина, влагоустойчив (не го потапяйте в течност), не докосвайте острите ръбове, не докосвайте уреда с мокри ръце и ако уредът се намокри, незабавно изключете основното захранване.
- Редовно проверявайте дали електрическите уреди не са повредени, ако са повредени, моля, не използвайте
-

Глава 2: Описание на компонентите:

- A. Купа за кафе на зърна
- Б. Бутона за избор на количеството смляно кафе
- С. Контролен панел 1
- Д. Изход на смляното кафе
- Е. Тава за събиране на излишната вода
- Ф. резервоар за вода
- Г. Контролен панел 2
- Н. Дръжка
- И. Чаша-контейнер за варене
- Ј. Тръба за пара

Глава 3: Описание на контролния панел:

Описание на контролния панел

	Бутони	Описание на функцията		Бутони	Описание на функцията
POWER	Бутона за включване on/off	Включване и изключване на кафемашината	BREW	Бутона за приготвяне на кафето	След като изберете желания размер на чашата, натиснете бутона за приготвяне на кафе и машината ще започне да приготвя кафе.
GRIND	Бутона за смилане на кафе	Натиснете бутона за мелене на зърна, за да започне машината да мели зърна, след това натиснете бутона, за да спрете меленето на зърна	HOT WATER	Бутона за топла вода	Поставете чашата (не по-малко от 300 ml) в изхода на тръбата за пара и след това натиснете бутона за функцията за гореща вода, натиснете отново бутона, за да спре изтичането на вода

VOLUME SELECT	Бутона за избор на количеството кафе	Изберете желаното количество кафе	 STEAM	Бутона за пара	Поставете чаша, пълна 1/3 с мляко под изхода за пара. Натиснете бутона за разпенване. Когато е достигнато желаното ниво на млячна пяха, натиснете отново за да спрете разпенването.
--------------------------	--------------------------------------	-----------------------------------	---	----------------	---

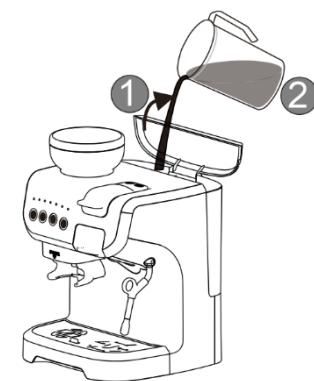

Глава 4: Начини на употреба:

Машината трябва да се изплакне след първата употреба или след дълъг период на неизползване. Методът на промиване е както следва:

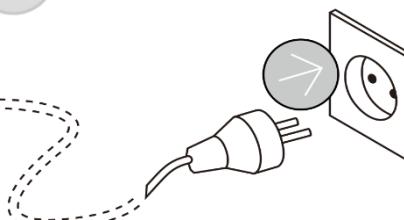

1

Метод 1

1. Вдигнете капака на резервоара
2. Налейте не повече от 2 литра чиста вода в резервоара (температура на водата не по-висока от 35 °C)

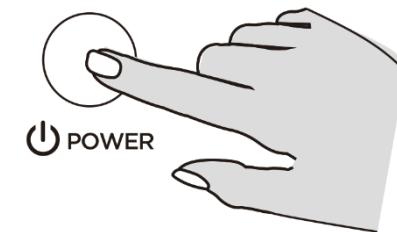

2

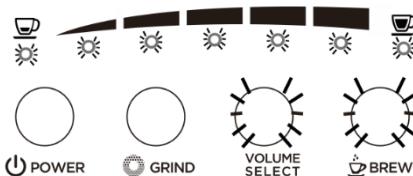

Включете щепсела в контактa

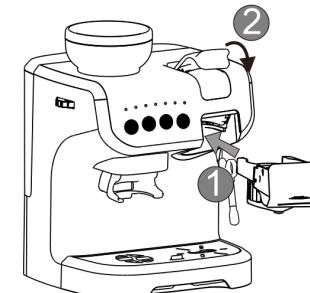

3

Натиснете бутона ВКЛ.

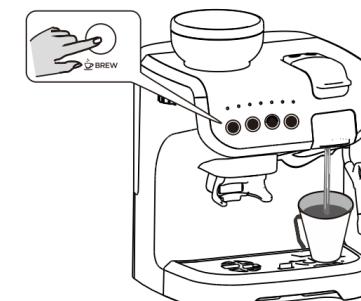

4

При избор на бутона за количеството кафе, ако има мигаща светлина, това означава, че количеството вода е малко. Долейте вода. Когато червената лампичка изгасне, машината е в режим

5

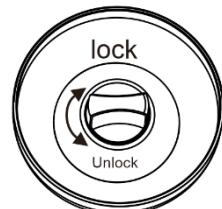

1. Поставете капсулата с кафе

1. Поставете чаша с вместимост над 100 ml над капака на тавата за отпадъчни води и натиснете бутона за пригответяне на кафе.

2. Затворете дръжката

Бутон за избор на размер на чаша / Бутон за приготвяне на кафе / Мигане, Статус на предварително загряване

Приготвяне на кафе с кафе на зърна

Уверете се, че купата, в която се поставя кафето на зърна е поставена правилно на мястото и.

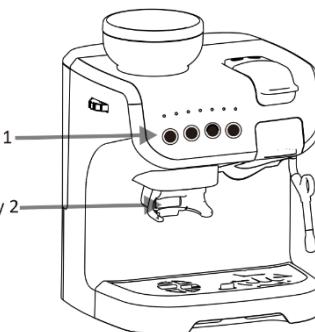

1

1. Когато купата за зърна е отключена, червената светлина свети и функцията за смилане на зърна не работи в този момент.
2. Когато е в заключено състояние светва синята светлина, функцията за смилане на зърна вече работи.

2

Функционални бутони за смилане на кафе

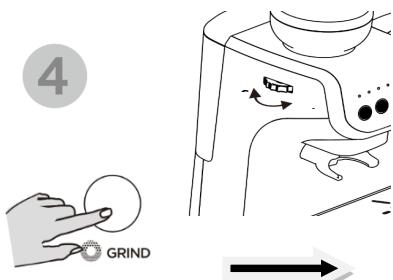

1. Натиснете GRIND за да започне смилането. Натиснете отново за да спре смилането.
- Ключ 2: Използвайте чашата за варене, за да натиснете напред и да стартирате функцията за мелене на кафе на зърна, натиснете отново контролния ключ 2, за да спрете функцията за мелене на кафе на зърна.

3

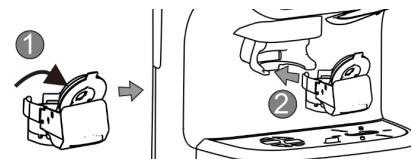

Сипете не повече от 150g. кафе в купата

4

Натиснете GRIND за да започне смилането

5

Натиснете GRIND за да стартирате смилането.

Когато достигнете желаното количество

кафе натиснете GRIND за да спрете функцията

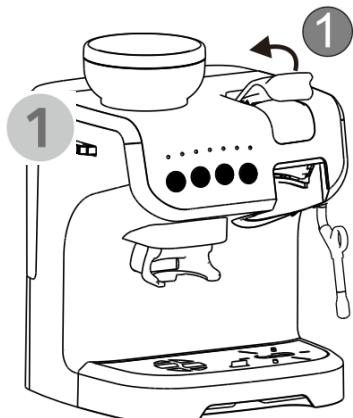

! Внимание: ако бутона за мелене е включен, но няма никаква операция 13 секунди, той ще се изключи автоматично.

2. Натиснете чашата за варене отново, натиснете GRIND и

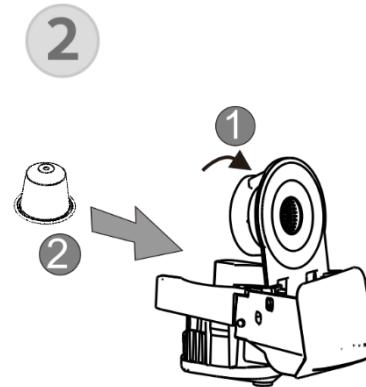

Бележка:

Когато времето за смилане продължи 4 минути (смилане на зърна около 6-7 пъти), бутона за смилане на зърна светва червено, машината спира функцията за смилане на зърна, оставете машината да почине 8 минути, след като функцията за смилане се върне към нормалното

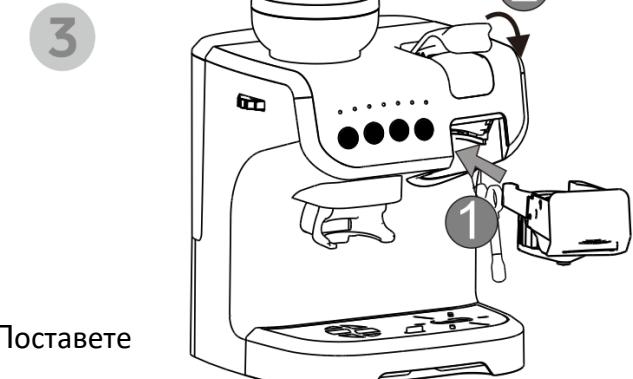

1. Отворете капака
За капсула Nespresso (или капсула Dolce Gusto)
2. Поставете
смляното кафе

Отворете дръжката, за да
извадите контейнера

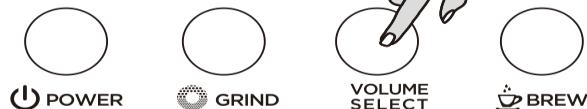

Сложете капсула Nespresso (или Dolce Gusto).

Поставете
контейнера с
капсулата и
пуснете

4

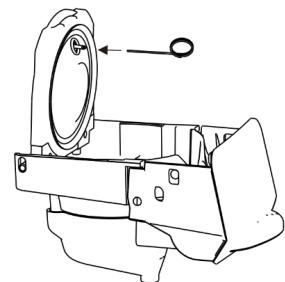

5

Внимание: контейнера за варене се запушва
често. Почиствайте го редовно!

Ключ за избор на размер на чаша:
Могат да бъдат избрани 7 размера
чаша.

- Поставете чаша с вместимост над 100 мл върху
капака на тавата за отпадни води и натиснете
бутона за приготвяне на кафе.

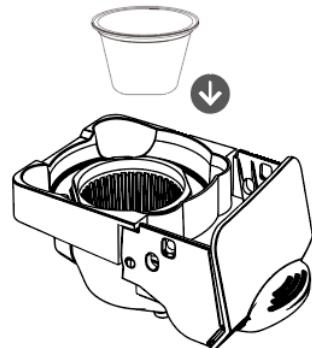

За LAVAZZA Blue капсули

1

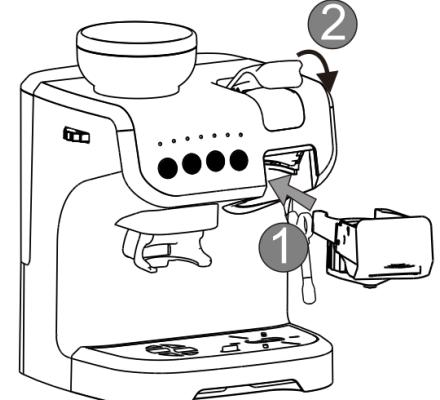

Отворете дръжката, за да
извадите контейнера за варене

2

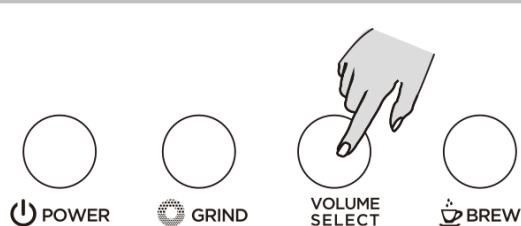

Поставете капсула LAVAZZA Blue в контейнера за
варене

3

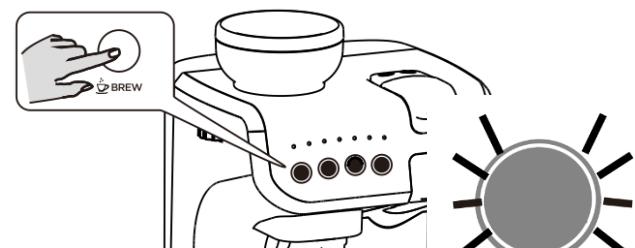

Пъхнете
контейнера за
варене и
затворете

4

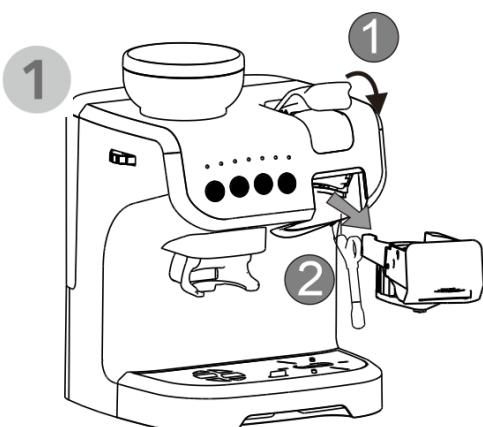

5

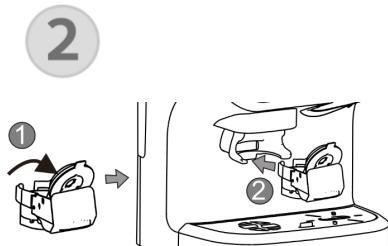

Избор за количеството кафе-7 възможности

- Поставете чаша с вместимост над 100 мл върху капака на тавата за отпадни води и натиснете бутона за приготвяне на кафе, за да започнете да приготвяте кафе.

За мляно кафе

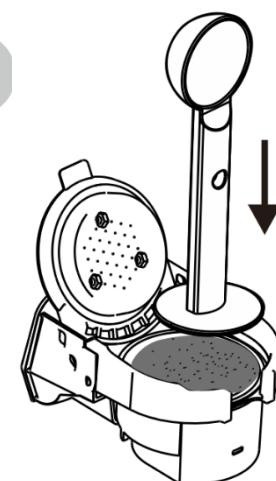

Отворете дръжката, за да извадите контейнера за варене

- Натиснете GRIND за да стартирате смилането. Когато достигнете желаното количество, натиснете GRIND за да спрете процеса.

! Note:1 Turn on the bean grinding function button, without any operation 13 seconds after the automatic stop grinding beans

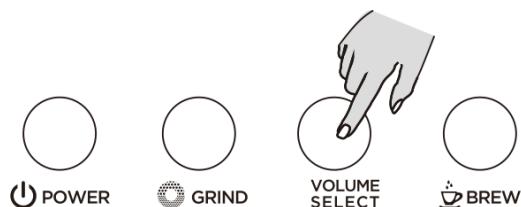

2. Push the brewing cup forward again and press GRIND again to stop grinding.

Натиснете смяното кафе с лъжица за кафе

За E.S.E кафе Pod

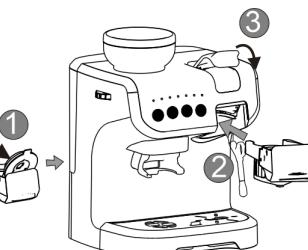

4

Изберете количеството кафе-
възможности.

5

1. върнете капака на контейнера за варене и
2. Поставете в отвора за смляно кафе

кафе-
възможности.

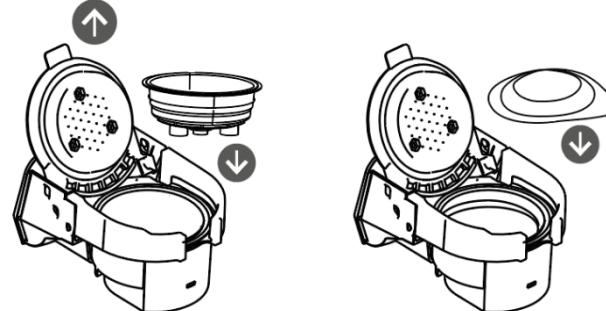

. Поставете чаша с вместимост над 100 ml върху капака на тавата за отпадни води и натиснете бутона за приготвяне на кафе, за да започнете да пригответе кафе.

1

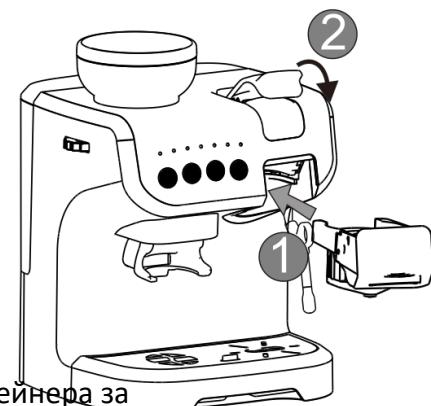

Отворете дръжката, за да извладите контейнера за варене

2

Поставете E.S.E кафе Pod в
контейнера за варене

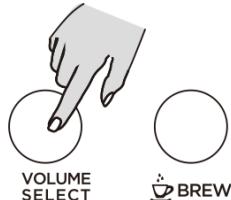

3

Пъхнете контейнера за
варене и затворете

Гореща вода

4

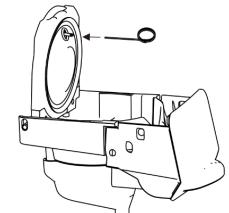

Изберете количеството кафе-
възможности.

5

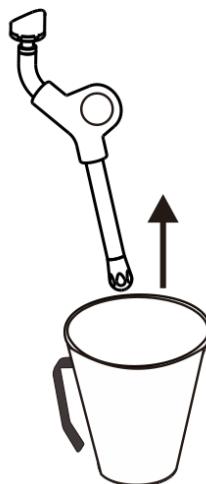

- Поставете чаша с вместимост над 100 мл върху капака на тавата за отпадни води и натиснете бутона за приготвяне на кафе, за да започнете да пригответе кафе.

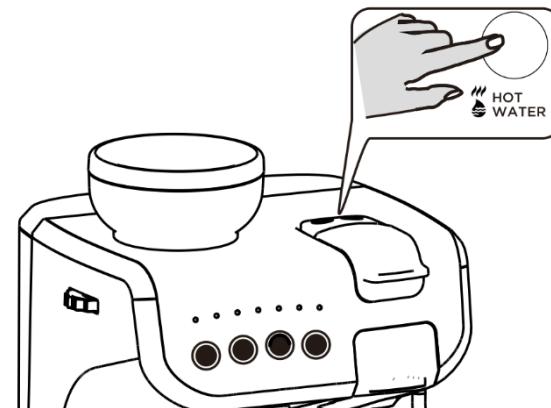

Внимание: контейнера за
варене се запушва често.
Почиствайте го редовно!

1

Поставете чашата в тръбата за
пара.

2

Натиснете бутона за функцията
гореща вода

Приготвяне на млечна пяна

3

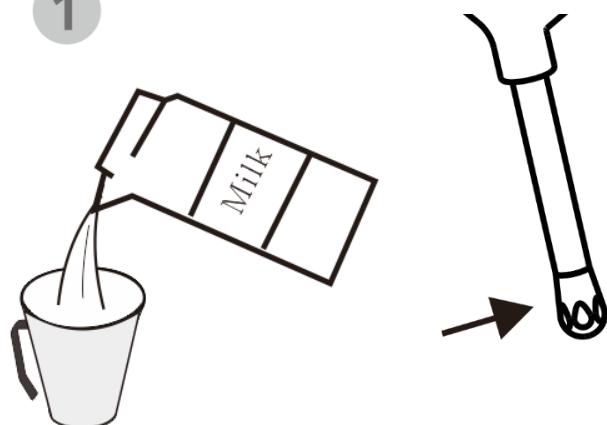

Когато налеете желаното количество топла вода,

 HOT WATER натиснете за да спрете изтичането на вода.

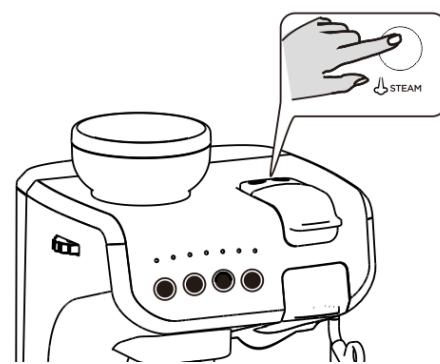

(Уверете се, че в резервоара за вода има повече от 150 мл.)

1

2

3

Поставете тръбата за пара на 1-2 см от повърхността на млякото,

Приближете позицията 3 часа от дясната страна на чашата и изчакайте да се

Налейте в чашата не по-малко от 50 мл прясно мляко.

Натиснете бутона за пара.

Бавно спуснете чашата, докато тръбата за пара върти млякото по посока на часовниковата стрелка. Това ще върне тръбата за пара към повърхността на млякото и ще започне да смесва въздух в млякото. Използвайте тръбата за пара, за да разклатите леко повърхността на млякото и да оставите млякото да се върти с правилната скорост.

Поставете тръбата за пара от страната на млякото на същото ниво или малко под повърхността и оставете млякото да продължи да се върти и завихря. Продължете да работите, докато млякото достигне желаната консистенция и чашата стане гореща на допир. Натиснете бутона за пара, за да спрете процеса на разпенване на мляко.) Натиснете бутона за пара, за да спрете процеса на разпенване на мляко.

Глава 5: Модели за енергийна ефективност

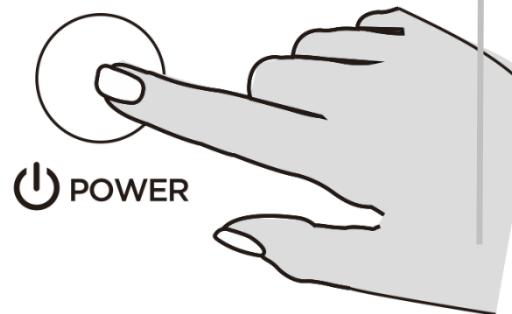

>15 minutes

Енергоспестяващ режим

1. Машината се доставя с енергоспестяващ режим от фабриката.

Машината се изключва автоматично след 15 минути.

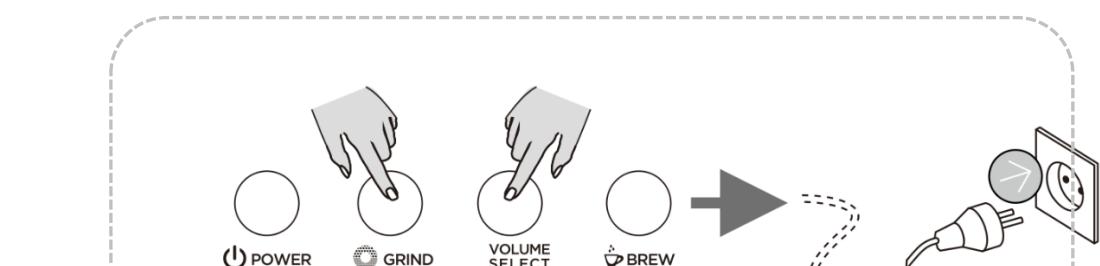

2. когато машината е в изключено състояние, натиснете отново бутона включване и тя ще влезе в режим на готовност.

Настройка на енергоспестяващ режим

Натиснете и задръжте бутона GRIND и бутона VOLUME SELECT едновременно, включете захранването и включете в контакта.

Натиснете бутона GRIND, за да изключите светлината.

Глава 6: Модели за отстраняване на накип

Внимание.

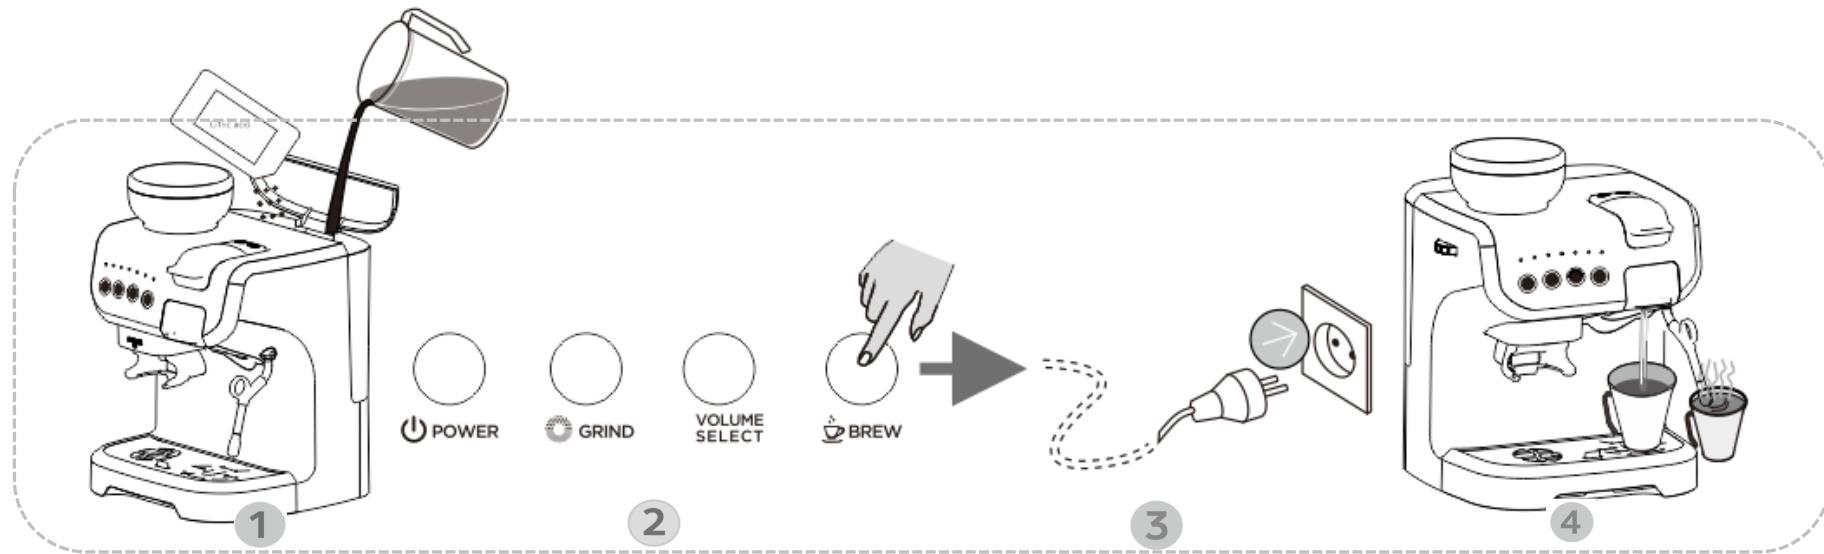

При продължителната употреба на машината, вътрешната водна система на машината генерира котлен камък. Ако машината показва нежелани явления като значително намаляване на количеството кафе или запушване, машината трябва да се отстрани от котления камък, като се използва режимът за отстраняване на котлен камък.

Функция за режим на декалциране

- 1 Поставете чаша в предната част на машината на мястото на изхода за вода и парата.
2. Добавете 1 литър чиста вода към резервоара за вода и поставете подходящото количество препарат за отстраняване на котлен камък.
3. Натиснете и задръжте бутона BREW кафе едновременно, без да го пускате, включете щепсела.
4. Включете ключа и светлината на бутона BREW кафе, натиснете бутона BREW кафе, функцията за отстраняване на котлен камък започва, работното натоварване е 1 литър вода. След това натиснете бутона Power, за да излезете от функцията за режим на отстраняване на котления камък.

! Предупреждения

Когато машината прави не повече от 400 чаши кафе, тя трябва редовно да се почиства от котления камък съгласно горната функция.

Глава 7: Други функционални настройки

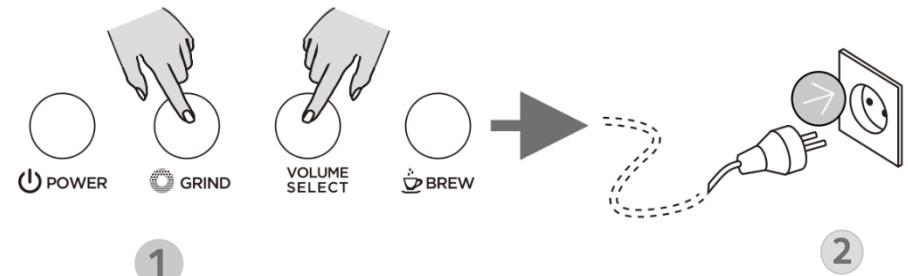

Настройка на режима преди varене

Едновременно натиснете и задръжте (GRIND) бутон за смиление на зърна, (VOLUME SELECT) бутон за избор на размер на чаша , включете в контакта.

Натиснете (VOLUME SELECT), за да изключите бутона за избор на размер на чаша. Режимът на горещо varене е отменен

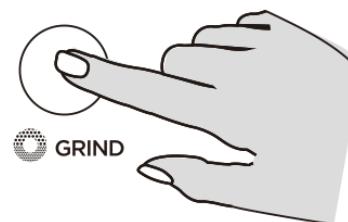

Натиснете (VOLUME SELECT) бутон за избор на размер на чаша, светва индикатора. Активиран е режим Hot Brew

Натиснете отново бутона за захранване (POWER), за да излезете от настройката за режим на предварително пригответяне.

Настройка на функцията за време на смиление на зърна

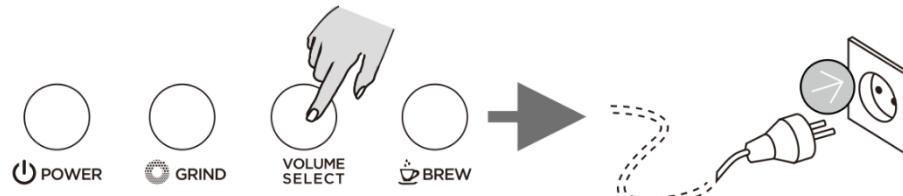

Натиснете  и задръжте в режим на готовност, изчакайте желаното време за смиление и след това пуснете бутона, функцията за време за смиление е зададена. Минимум 9 секунди, максимум 20 секунди.

Възстановяване на фабричните настройки

Възстановяване на настройките

1. Натиснете и задръжте (VOLUME SELECT) бутона за избор на обем на чашата, без да пускате ръката си, включете захранването, всички индикаторни светлини мигат два пъти, възстановяването на фабричните настройки е завършено.

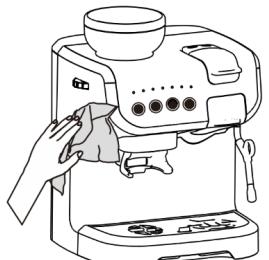

Глава 8: Почистване

Внимание.

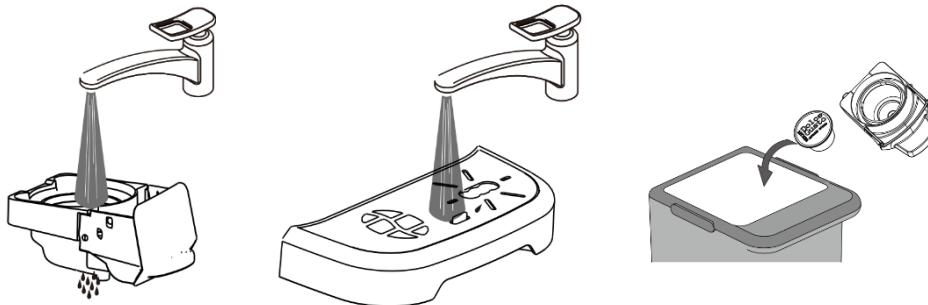

- 1 Никога не потапяйте кафемашината във вода.
- 2 Уверете се, че машината е изключена от контакта преди почистване.
- 3 Не използвайте силни препарати, остри предмети, четки или други предмети за почистване на кафе машината.

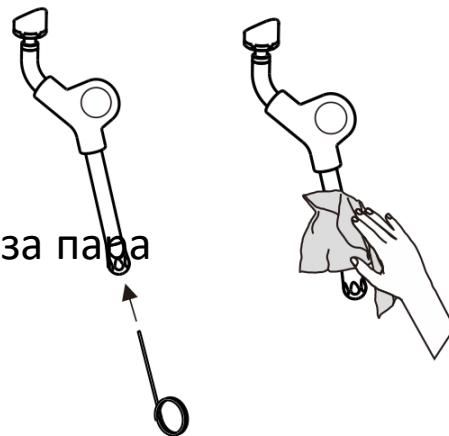

Почистване на
цялата машина

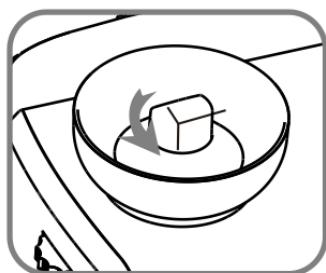

Почистване на аксесоарите

Почистване на тръбата за пара

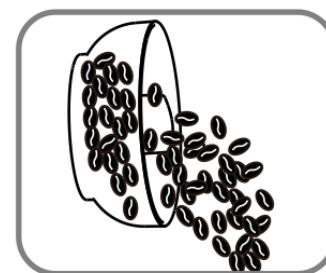

Bean Box Cleaning Please follow the steps below to clean the bean box.

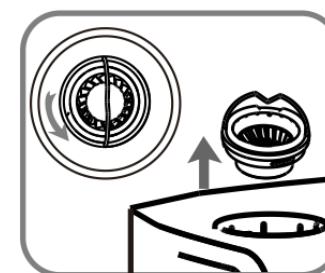

1. Unlock the beanbox.

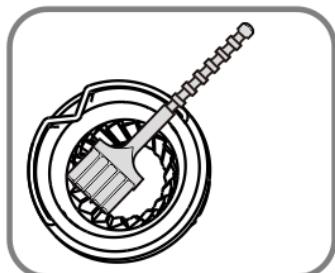

2. Remove the bean box

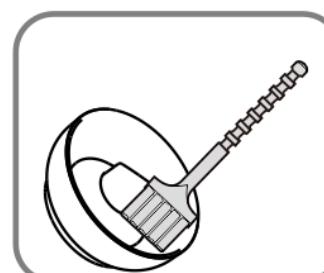

3. Изпразнете я

4. Отключете мелницата обратно на часовниковата стрелка и я вдигнете

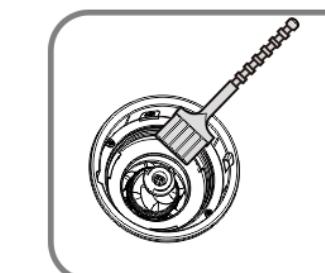

5. Почистете мелницата с четка

6. Почистете кутията за зърна с четка

7. Почистете отвора за прах с четка

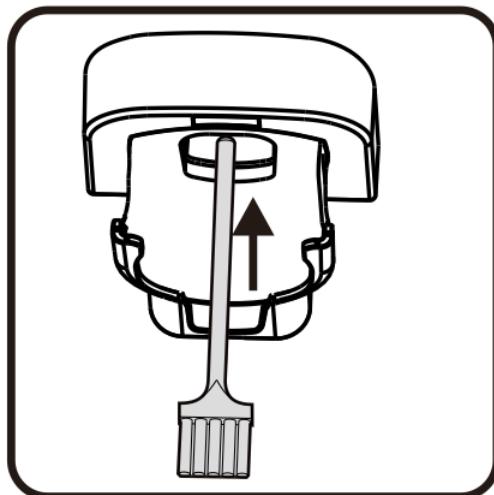

8. Почистване ножовете с четка

Запушване

Изходът за смляно кафе е блокиран поради разлика в кафените зърна на, недостатъчно сухо или неправилна работа.

Следвайте стъпките за почистване

Solve the coffee powder blocking

1. Unlock the bean box.

2. Remove the bean box.

3. Pour out the excess coffee beans.

4. Unlock the grinder counterclockwise and take it out.

5. Clean the grinder with the brush.

6. Remove nut and gasket clockwise.

2. Отстранете четката за прах, за да почистите изходния канал за прах

Глава IX: машината не излиза от метода за пречистване на водата

Внимание.

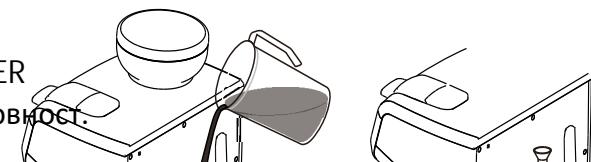

1. Първо използване на нова машина.
2. продължителни периоди на неизползване.
3. Недостиг на вода в резервоара за вода по време на работа.

Ще има вероятност машината да не може да изпомпва водния феномен, има 2 вида решения, вижте фигурата (метод 1 / метод 2)

Напълнете машината с вода, като използвате "ръчна помпа", прикрепена към машината.

Натиснете и задръжте бутона POWER докато машината е в режим на готовност.

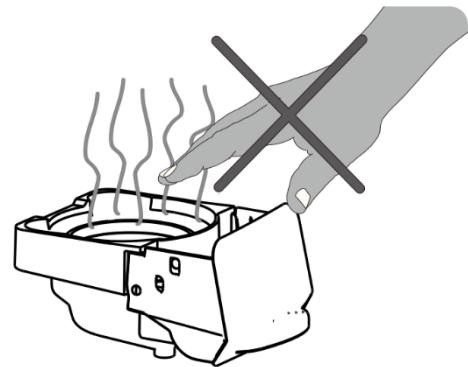

Глава 10: Предпазни мерки

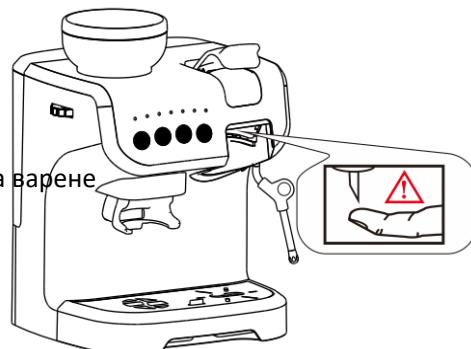

Забранява се директно наливане на вода
на машината

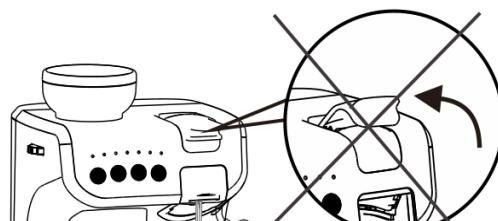

Внимавайте за топлината.
Свареното кафе все още носи малко количество
остатъчна топлина, обърнете внимание на високата температура

Остър предмет в мястото на контейнера за варене
Когато чашата за варене се извади, не
поставяйте ръцете си в машината.

Забранено е отварянето на дръжката
докато машината работи

Глава XI: Често задавани въпроси

Повреда	Възможни причини	Решения
Светлинният индикатор не светва	1. Захранването не е свързано 2. Функцията не е натисната	1. Проверете дали захранващият кабел е включен 2. Не е натиснат на бутона за включване/изключване. 3. Уверете се, че захранването е правилно включено и захранването е правилно съвпадащо, ако машината пак не се пуска, моля, потърсете оторизиран сервис
Изтичане на вода или просмукване	1. Теч от резервоара за вода 2. Течове от контейнера за варене	1. Проверете дали резервоарът за вода е на място или не е повреден 2. Свържете чашата за приготвяне със съответната капсула за кафе
Не загрява	Не е включен бутона ON	Проверете дали електрическият контакт е включен, ако не работи, моля, намерете професионална поддръжка
Водата изтича от дъното на кафемашината	Има твърде много вода в съда за събиране на излишната вода	Почистете тавата Извършване на ремонт от професионалист
Кафето капе твърде бавно или не излиза	. Несъответствие на кафе капсула	1. Уверете се, че капсулата за кафе съвпада с чашата за приготвяне. 2. Моля, почистете чашата за варене, ако е запушена.

Chapter 1: Precautions for Safe Use

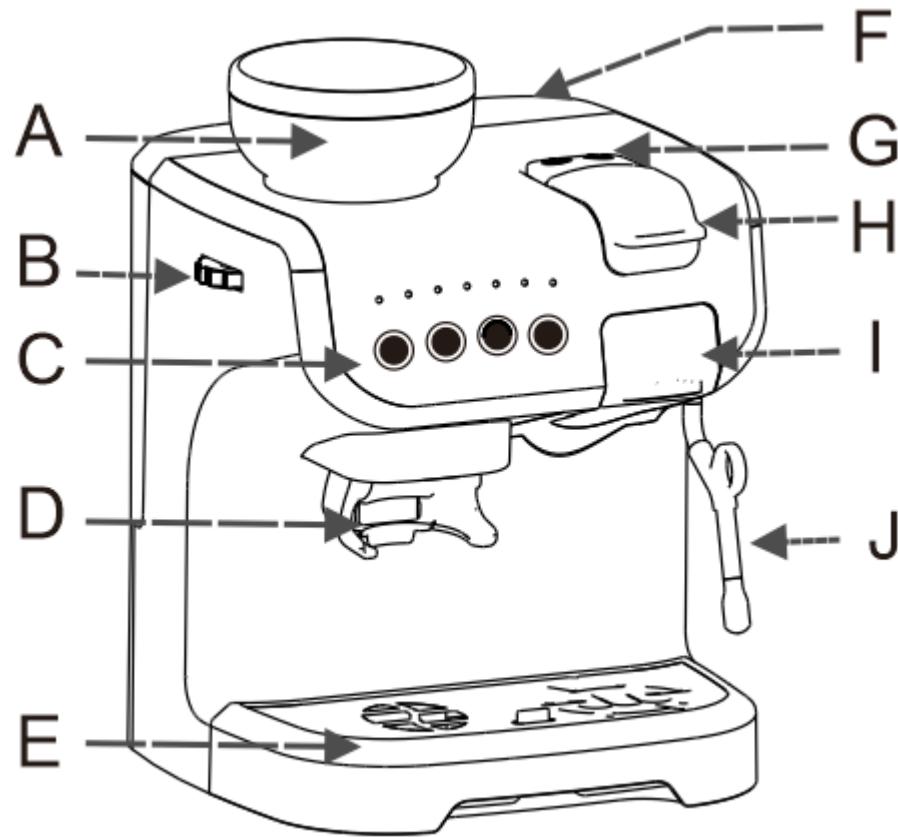

Read this manual carefully before use and please note the following:

Make sure the machine is switched off when unplugged:

- Danger of electric shock! Do not touch the power plug/socket/power supply or the machine when your hands are wet. Do not disconnect the power supply by pulling the power cord.
- Danger of scalding! Do not move the machine while it is working!
- Scalding hazard! Do not touch hot parts of the machine (e.g. parts that boil water or parts that dispense water during operation).
- Danger of scalding! Keep away from steam and water jets!

- Scalding hazard! Do not open the handle while the machine is working
- Danger of electric shock! Do not immerse the machine, power cord and plug in water or other liquids!
- Make sure the machine is unplugged and cooled down before cleaning or servicing.
- Before connecting to the power supply, check that the local power supply voltage matches the indicated voltage.
- Electrical appliances are not intended for use by physically, sensory or mentally handicapped persons (including children), or by inexperienced and uneducated persons unless they have been supervised or instructed by a responsible person in charge of their safety, and adults should instruct children not to play with electrical appliances.
- Do not allow children to use this product or as a toy.
- Do not use the product when the plug, cord or product is damaged. Go to a service center for inspection as soon as possible, do not modify, disassemble or repair by yourself.
- This product is for domestic use only and cannot be used for any other purpose.
- Please use the product on a smooth, heat-resistant surface, and do not use it in a humid or dusty environment. Do not use the product near open flames, heat or splashes of water to avoid accidents.
- When the product appears abnormal, stop using it immediately.
- Do not cover the top cover while the product is in operation.
- When the product operates, pay attention to the water vapor, do not put your face close to the water outlet, so as not to make the burns
- Do not move the product while it is in operation to avoid accidents.
- Slight vibration will occur when the product is in operation, resulting in a slight movement of the coffee cup, which is normal.
- Do not open the handle while the product is in operation
- Do not put your fingers or other objects into the brewing cup to avoid accidents!
- Keep the product, cord and coffee capsules out of the reach of children.
- Do not fill the tank with hot water.
- Do not unplug by pulling on the power cord.
- Do not touch the power cord with wet hands
- Do not perform disassembly of the product
- The product must be turned off or unplugged before cleaning.
- Appliances should not be washed directly in water
- Don't use it outdoors, avoid the product getting hot, direct sunlight, moisture-proof (don't immerse it in liquid), don't touch the sharp edges, don't touch the appliance with wet hands, and if the appliance gets wet, immediately disconnect the main power supply.
- Regularly check the electrical appliances are not damaged, if damaged, please do not use
- If the power cord, plug or other parts are damaged, or the function is disabled, it is strictly prohibited to use the product, please submit it to the service store for testing, repair, and replacement by specialized personnel.

Chapter 4: Methods of use

The machine must be rinsed after the first use or after a long period of non-use. The method of flushing is as follows.

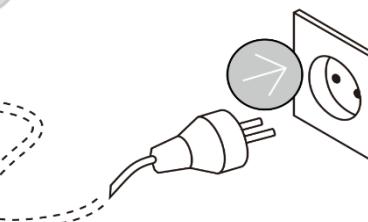

1

Method 1

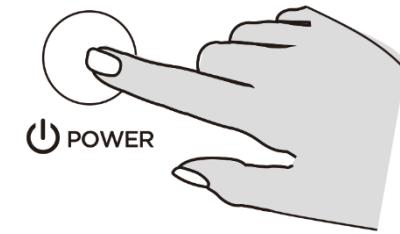

1. Flip up the tank lid
2. Pour no more than 2 liters of pure water into the tank (water temperature not higher than 35°C)

2

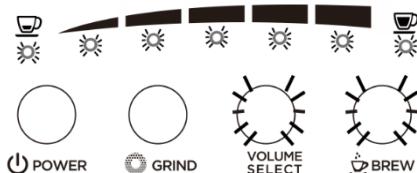

3

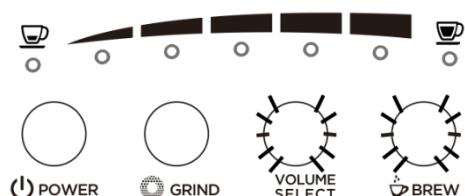

Plug in the corresponding power supply

Press the switch power

Situation 1

Coffee button / cup size selection button / light flashing, machine water shortage status.
Press the coffee button to allow the water circuit to fill and the red light to go out. The machine enters the preheating state.

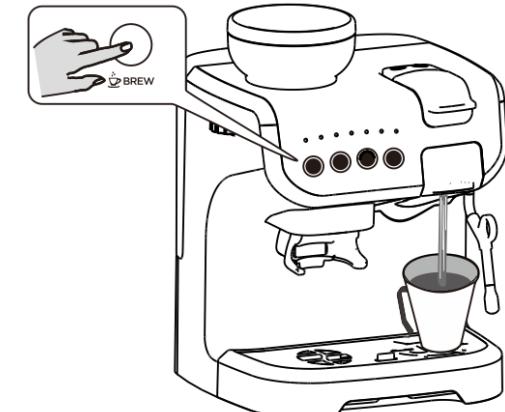

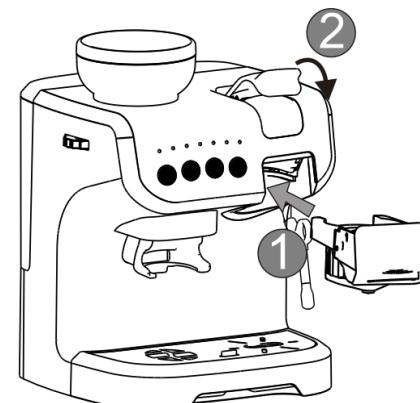

Cup Size Selection Button / Coffee Brewing Button / Flashing, Preheat Status Status

Preparation of coffee beans

4

5

Coffee Bean Grinding Production

1. Insert the brewing cup into the machine
 2. Closing handle
- Function keys for grinding beans

1. Place a cup with a capacity of more than 100 ml above the lid of the waste water tray and press the coffee brewing button.

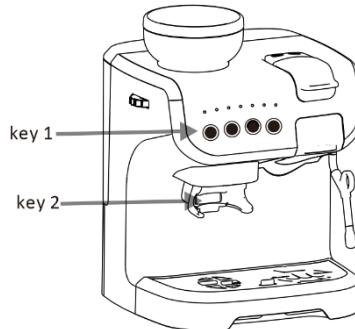

3

Make sure the bean box is locked before you put the beans in

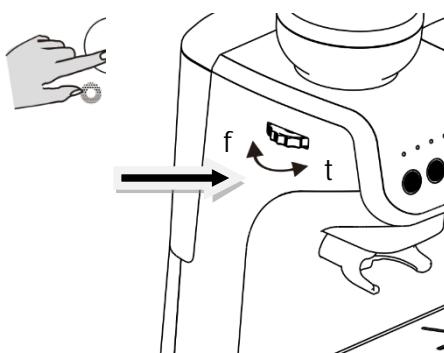

- When the bean box is unlocked, the red light is on, and the bean grinding function does not work at this time.
- Bean box in the locked state of the blue light, this time the bean grinding function can work.

- key 1: Press GRIND to start bean grinding function Press again to stop bean grinding function
- key 2: Use the brewing cup to push forward to start the bean grinding function, push control key 2 again to stop the bean grinding function.

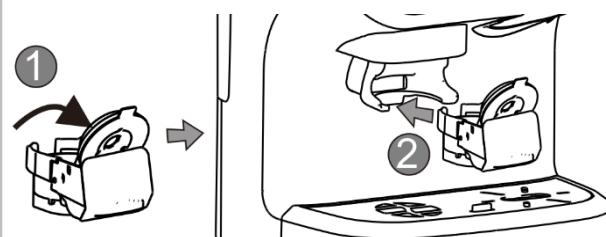

Pour no more than 150g of coffee beans into the bean box.

4

Press GRIND to activate the bean grinding function on Then use the adjusting wheel to adjust to your preferred coarseness of ground coffee.

5

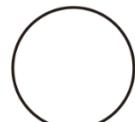

- hit the lid of the brewing cup and
- Insert the ground coffee outlet

Method 1

Press GRIND to turn on the grinding function until the desired amount of ground coffee is reached, then press GRIND again to stop grinding.

hint

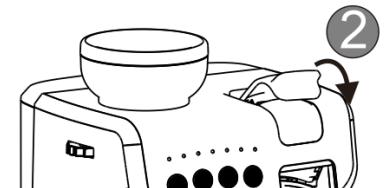

When the grinding time continuous cumulative work 4 minutes (grinding beans about 6-7 times) grinding beans button red light, the machine stops grinding beans function, let the machine rest 8 minutes after the grinding function returns to normal

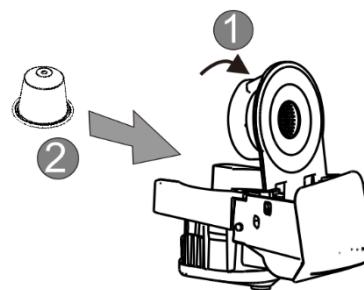

GRIND

! Note: 1 Turn on the bean grinding function button, without any operation 13 seconds after the automatic stop grinding beans

For Nespresso Capsule(or Dolce Gusto Capsule),
2 Push the brewing cup forward again and press GRIND again to stop grinding.

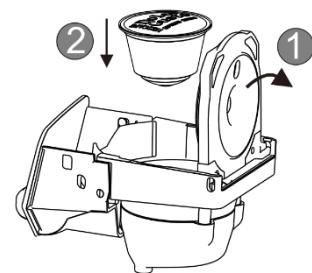

2

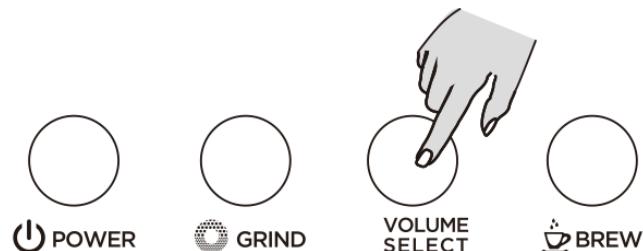

Open the handle to
remove the brewing cup

3

Insert the
brewing cup.
Then close the
handle.

4

Cup Size Selection Key: 7 cup sizes can be selected.

5

1. Place a cup with a capacity of more than 100 ml on top of the lid of the wastewater tray and press the coffee brewing button to start
For LAVAZZA Blue ~

caveat
Brewing cups tend to get clogged, so please clean them promptly.

1

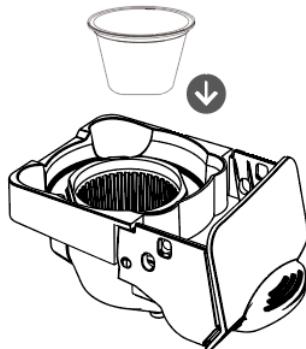

2

3

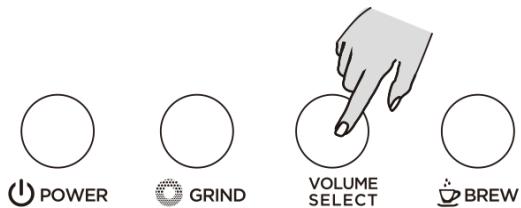

Open the handle to
remove the brewing cup

Put LAVAZZA Blue capsules into the brewing cup

Insert the
brewing cup.
Then close the
handle.

4

Cup Size Selection Key: 7 cup sizes can be selected.

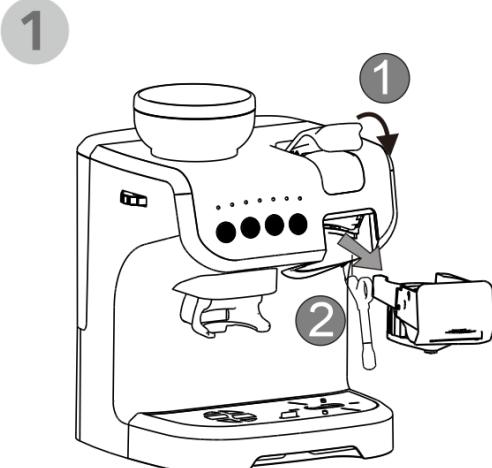

5

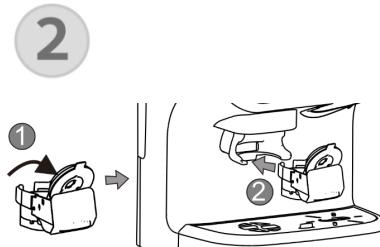

1. Place a cup with a capacity of more than 100 ml on top of the lid of the wastewater tray and press the coffee brewing button to start brewing coffee.

For Coffee Powder

Method 1

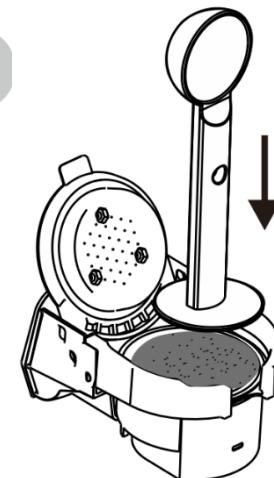

Open the handle to remove the brewing cup

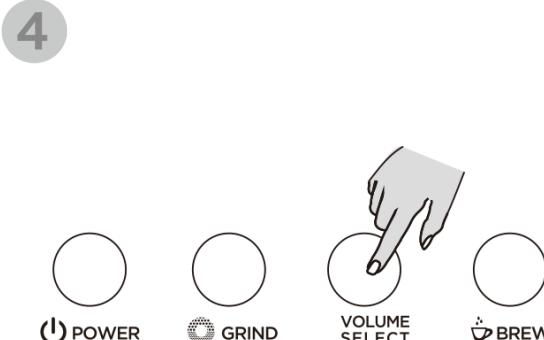

! Note: 1 Turn on the bean grinding function button, without any operation 13 seconds after the automatic stop grinding beans

2. Push the brewing cup forward again and press GRIND again to stop grinding.

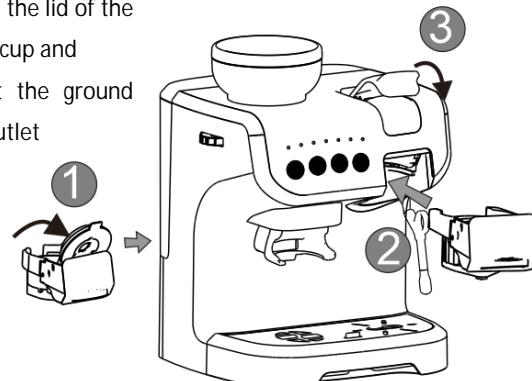

Press the ground coffee with a coffee scoop

Cup Size Selection Key: 7 cup sizes can be selected.

5

1. return the lid of the brewing cup and
2. Insert the ground coffee outlet

1. brewing cup lid closed.
2. Insertion of the brewing cup into the coffee brewing outlet
3. Closing handle

1. Place a cup with a capacity of more than 100 ml on top of the lid of the wastewater tray and press the coffee brewing button to start brewing coffee.

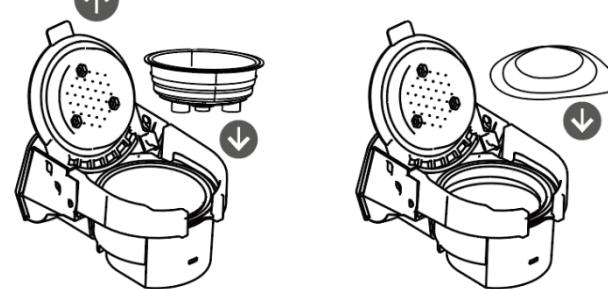

For E.S.E coffee Pod

1

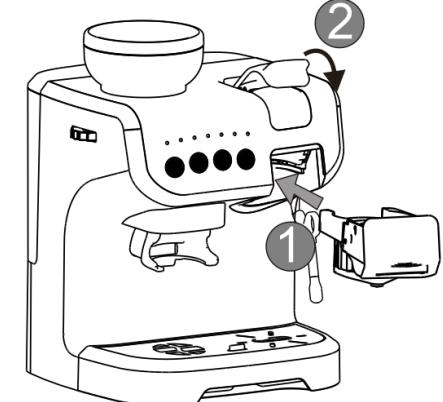

Open the handle to remove
the brewing cup

2

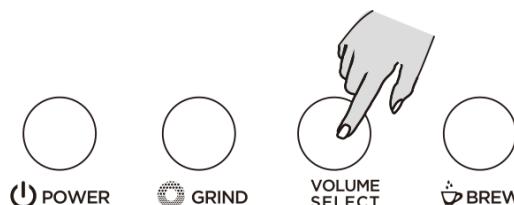

Put LAVAZZA Blue capsules into the brewing cup

3

Insert the
brewing cup.
Then close the
handle.

4

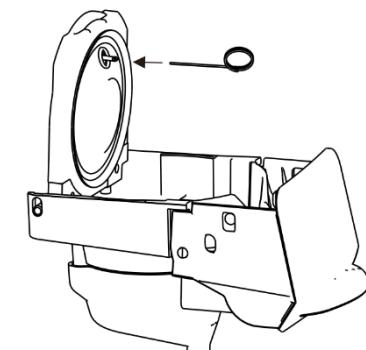

Cup Size Selection Key: 7 cup sizes can
be selected.

5

1. Place a cup with a capacity of more than 100 ml on top of the lid of the wastewater tray and press the coffee brewing button to start brewing coffee.

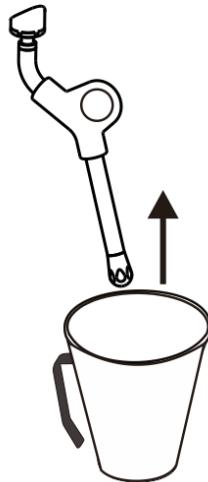

caveat

Brewing cups tend to get clogged, so please clean them promptly.

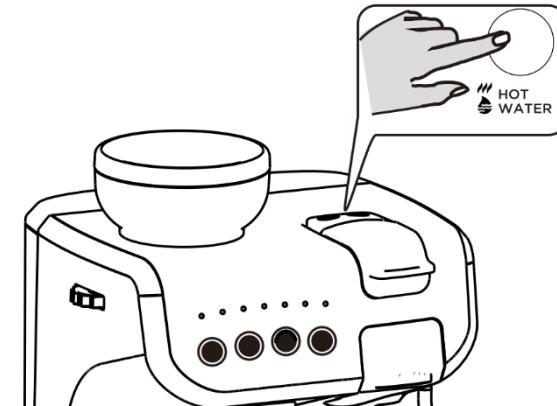

Hot water production

1

Put the cup in the steam pipe.

2

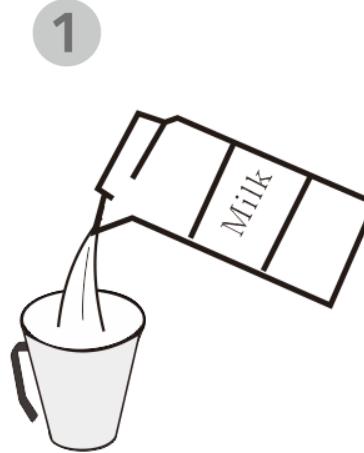

Press the hot water function button

3

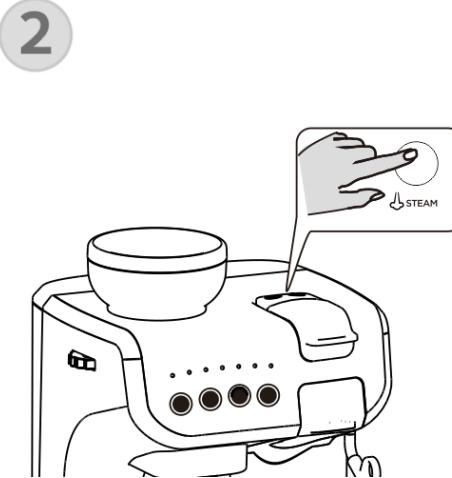

When you have finished making hot water, press the **HOT WATER** key to finish making hot water. (Make sure there is more than 150ml of pure water in the tank)

Milk Froth Making

Pour no less than 50ML of fresh milk into the cup.
Ensure that the milk sinks through the steam nozzle

Press the steam button.

Insert the steam wand 1-2 cm from the surface of the milk,
Approach the 3 o'clock position on the right side of the cup and wait for steam to form.

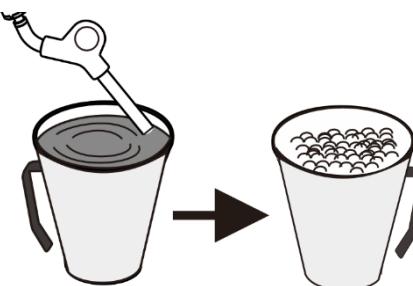

4

Slowly lower the glass as the steam wand swirls the milk in a clockwise direction.
This will bring the steam wand back to the milk surface and begin to mix air into the milk.

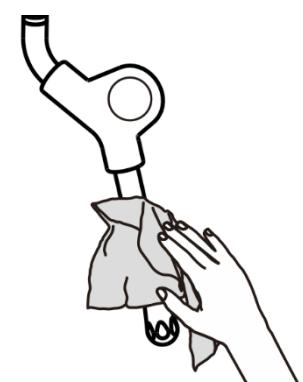

Use the steam wand to gently agitate the milk surface and allow the milk to swirl at the proper speed.

Place the steam wand on the milk side at the same level or slightly below the surface and allow the milk to continue to swirl and vortex. Maintain operation until the milk reaches the desired consistency and the glass feels hot to the touch.

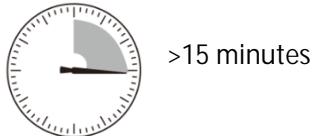

Press the steam button to stop the milk frothing process.) Press the steam button to stop the milk frothing process.

5

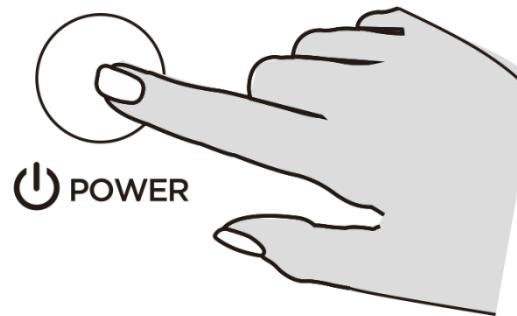

Chapter 5: Energy efficiency models

Energy Saving Mode

1. The machine comes with energy saving mode from the factory
The machine switches off automatically after 15 minutes, all function indicators
2. machine in the off state, press the switch key again machine restart again

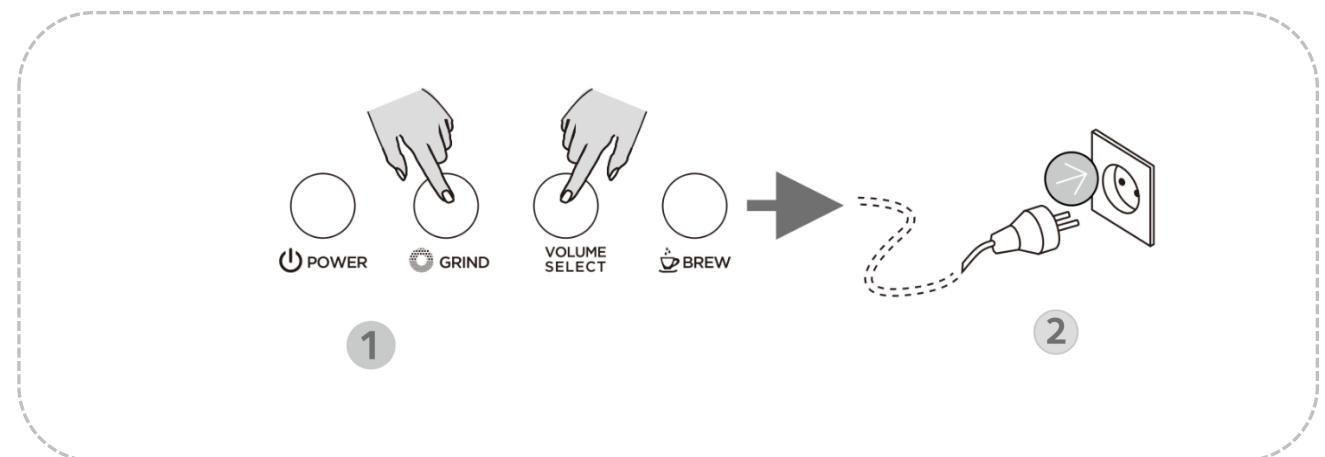

Energy saving mode setting

Press and hold the GRIND key and VOLUME SELECT key at the same time, plug in the power supply and turn on the power.

Press the GRIND key to turn off the light. Energy saving mode canceled

Press GRIND key key light on . Energy saving mode enabled

Press POWER again to exit the energy saving mode setting

Chapter 6: Descaling patterns

Caution.

Due to the prolonged use of the machine, the internal water circuit system of the machine generates scale.

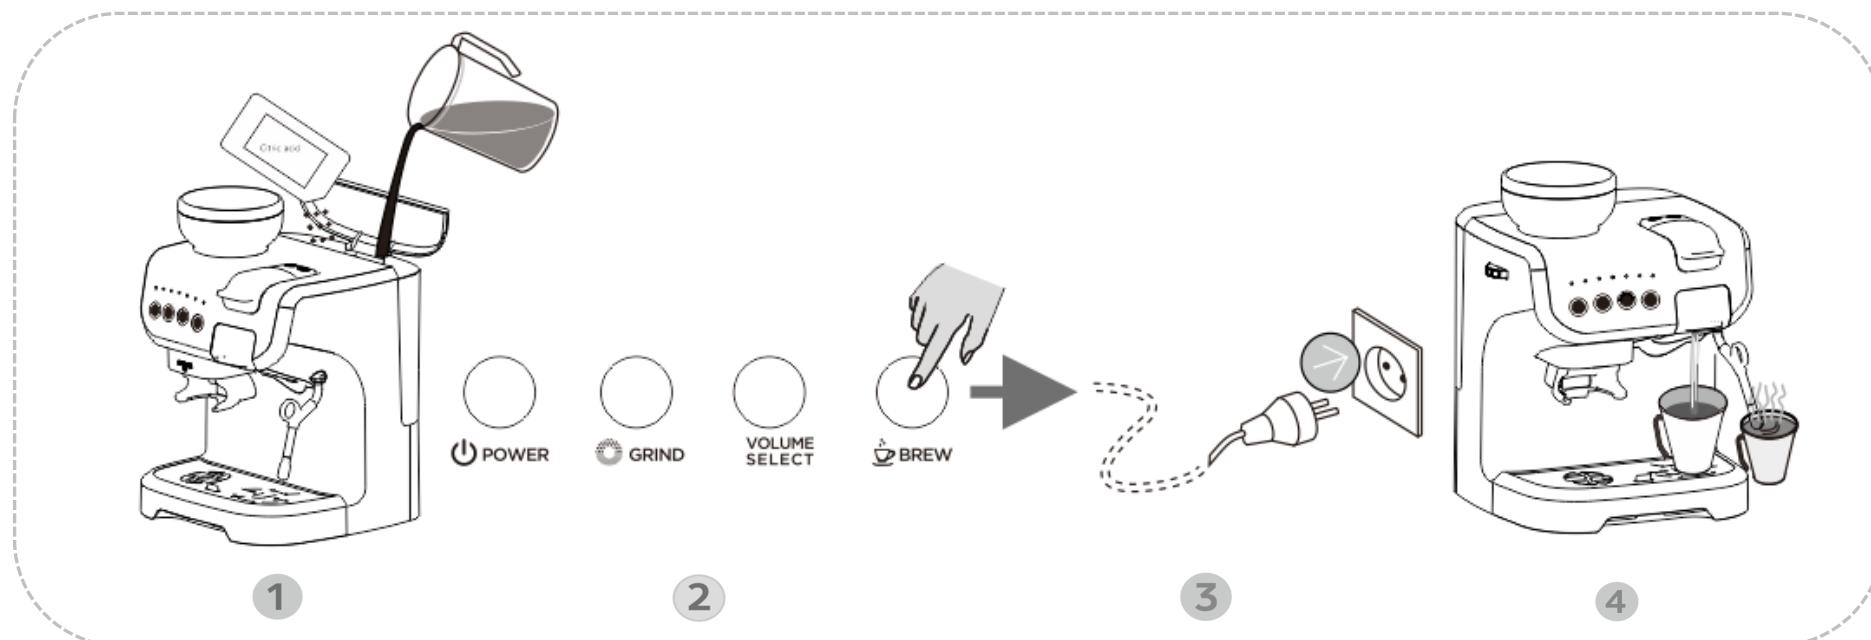

If the machine shows undesirable phenomena such as a significant reduction in the amount of coffee or clogging, the machine must be descaled using the descaling mode.

Descaling mode function

- 1 Place a cup in the front of the machine at the water outlet and steam outlet location
2. Add 1 liter of **pure water** to the water tank and put in the appropriate amount of descaling agent.
3. Press and hold the BREW coffee button at the same time without letting go, plug in the power plug in
4. Turn on the key and BREW coffee button light, press the BREW coffee button, the descaling function starts, the workload is 1 liter of water. And then press the POWER button to exit the descaling mode function.

! Cautions

When the machine makes no more than 400 cups of coffee it needs to be descaled regularly according to the above function.

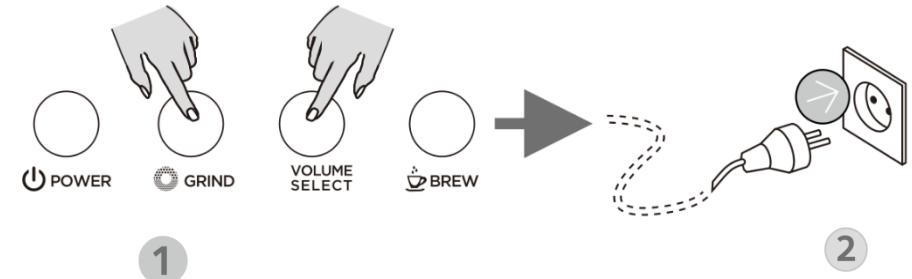

Chapter 7: Other Functional Settings

Pre-brew mode setting

At the same time press and hold (GRIND) grinding beans key, (VOLUME SELECT) cup size selection key do not let go of hand, plugged into the power supply power on
Press (VOLUME SELECT) to turn off the cup size selection button. Hot brewing mode canceled

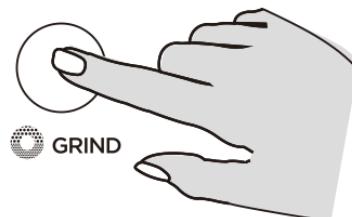

Press (VOLUME SELECT) cup size selection key key light on . Hot Brew Mode Enabled
Press the (POWER) power button again to exit the pre-brew mode setting

Bean grinding time function

quantitative setting

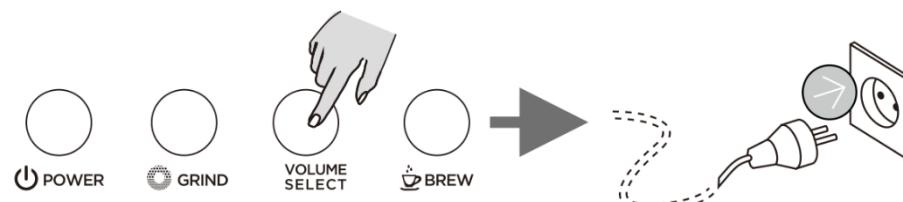

Press and hold  GRIND in standby mode, wait for the desired grinding time and then let go, the grinding time function is set. Minimum 9 seconds, maximum 20 seconds.

Restore Factory Settings

Restore settings

1. Press and hold (VOLUME SELECT) the cup volume selection key without letting go of your hand, plug in the power supply all the indicator lights flash twice, the recovery of factory settings is complete.

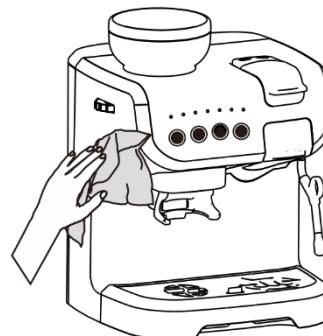

Chapter 8: Cleaning

Caution.

- 1 Never immerse the coffee maker in water.
2. Ensure that the machine is unplugged before cleaning.
3. Do not use strong detergents, sharp objects, brushes or other objects to clean the coffee machine.

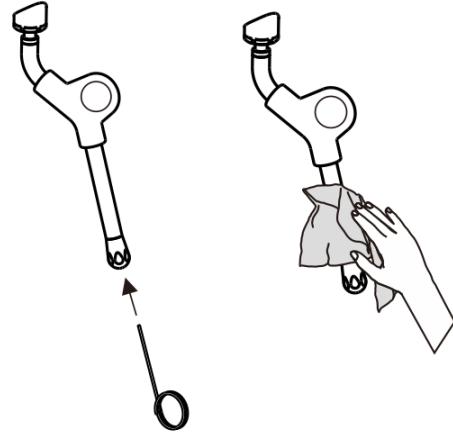

Cleaning of the
whole machine

Accessory

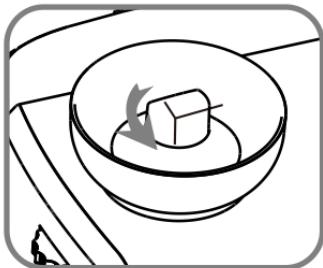

Steam Wand Cleaning

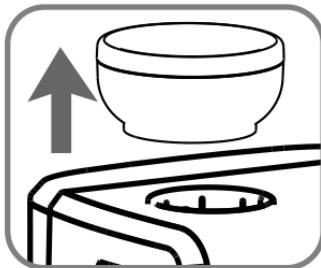

Bean Box Cleaning

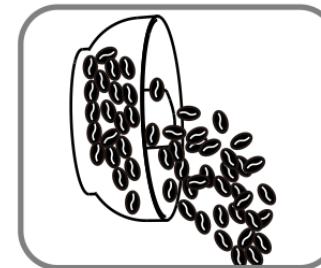

Please follow the steps below to clean the bean box.

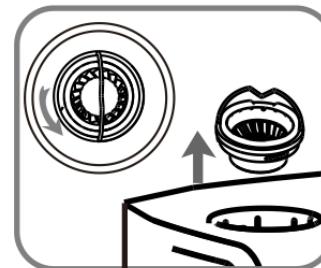

1. Unlock the beanbox.

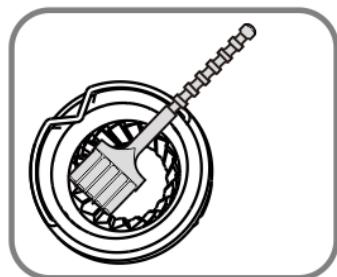

2. Remove the bean box

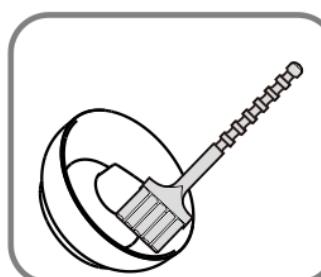

3. Emptying more than coffee beans

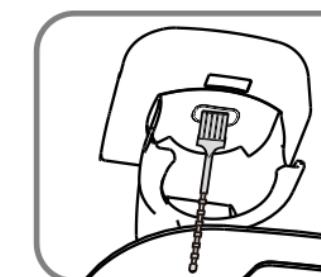

4. Unlock the grinder counter-clockwise and lift it away

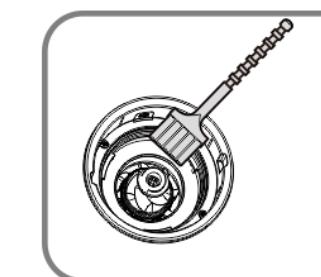

5. Clean the grinder with a brush

6. Clean the bean box with a brush

7. Clean the powder outlet with a brush

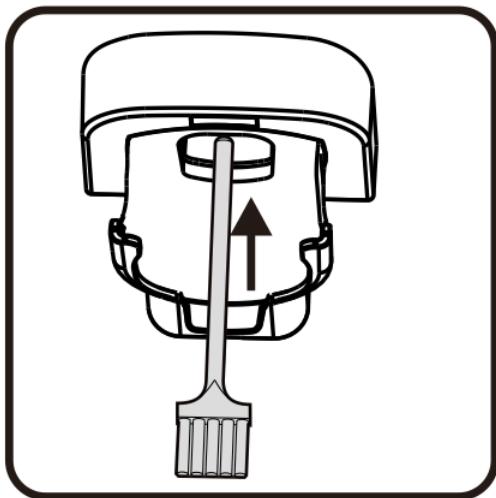

8. Cleaning of sharpening knives with a brush

Plugging powder treatment

The powder outlet is blocked due to the user's coffee bean difference, not dry enough or improper operation.

Follow the steps to clean up

2. Remove the powder brush to clean the powder outlet channel

Solve the coffee powder blocking

1. Unlock the bean box.

2. Remove the bean box.

3. Pour out the excess coffee beans.

4. Unlock the grinder counterclockwise and take it out.

5. Clean the grinder with the brush.

6. Remove nut and gasket clockwise.

7. Clean the sharpener and wheel with the brush.

8. Clean the grinding chamber with the brush.

Chapter IX: machine does not

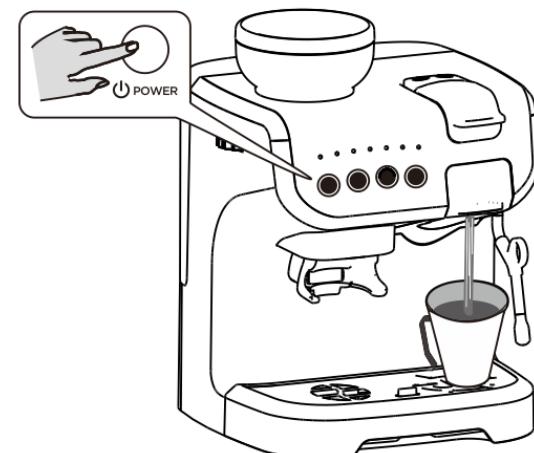

Caution.

1. First use of a new machine.
2. prolonged periods of non-use.
3. Water shortage in the water tank during operation.

There will be a chance that the machine can not pump the water phenomenon, there are 2 kinds of solutions see figure (method 1 / method 2)

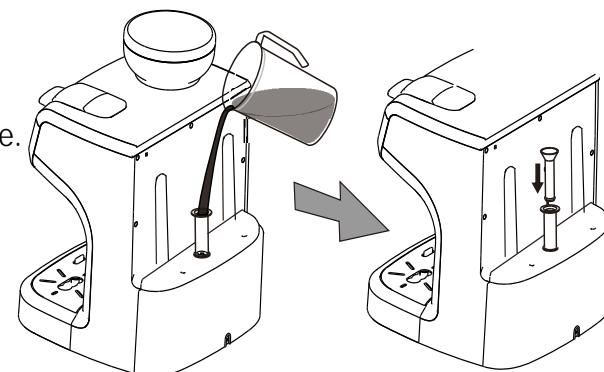

Method 2

Fill the machine with water by using the "hand pump" attached to the machine.

Method 1

Press and hold the POWER button while the machine is in standby mode.

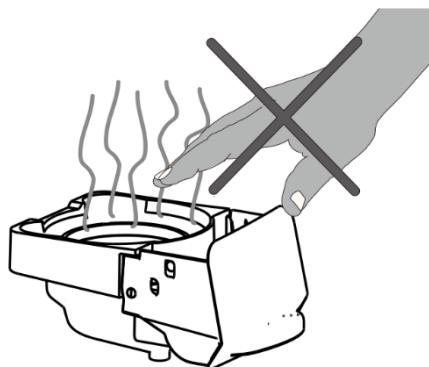

Chapter 10: Precautions

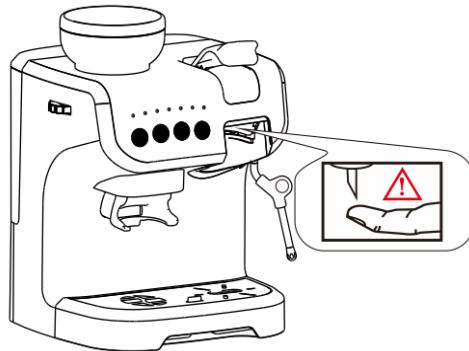

It is prohibited to pour water directly
on the machine

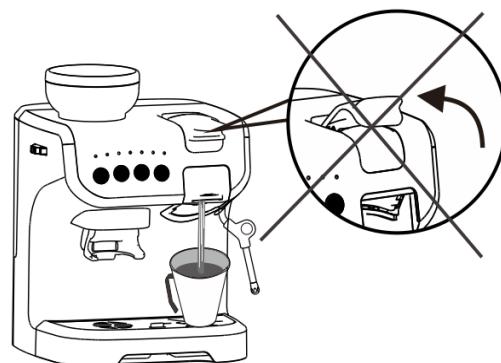

Watch out for the heat.
Brewed coffee still carries a small amount of
residual heat, pay attention to the high temperature

Sharp blade inside the brewing cup location
When the brewing cup is removed, it is
forbidden to put your hands in the machine.
Within the brewing location

It is forbidden to open the **handle**
while the machine is in operation

Chapter XI: Frequently asked questions

fault phenomenon	Possible causes	Methods of elimination
Indicator light does not come on	1. Power not connected 2. The function is not pressed	1. Check that the power connector is plugged in 2. Without pressing the on/off button. 3. Confirm that the power supply is properly plugged in and the power supply is correctly matched, but also appear this phenomenon, please find professional maintenance
Water leakage or seepage	1. Water Tank Leakage 2. Brewing Mug Leaks	1. Check that the water tank is in place or not damaged 2. Match the brewing cup with the corresponding coffee capsule
no heat	Power not on	Check whether the power socket is plugged in, if plugged in does not work, please find professional maintenance
Water flows out of the bottom of the coffee maker	There's too much water in the catch pan.	Clean the catch pan, which also runs out of the bottom Getting repairs done by a professional
Coffee dripping too slowly or not coming out	. Coffee capsule mismatch	1. Make sure that the coffee capsule matches the brewing cup. 2. Please clean the brewing cup if it is clogged.

Cafetieră cu râşniță de cafea integrată

Instrucțiuni de utilizare

Capitolul 1: Precauții pentru utilizarea în condiții de siguranță

Citiți cu atenție acest manual înainte de utilizare și vă rugăm să rețineți următoarele:

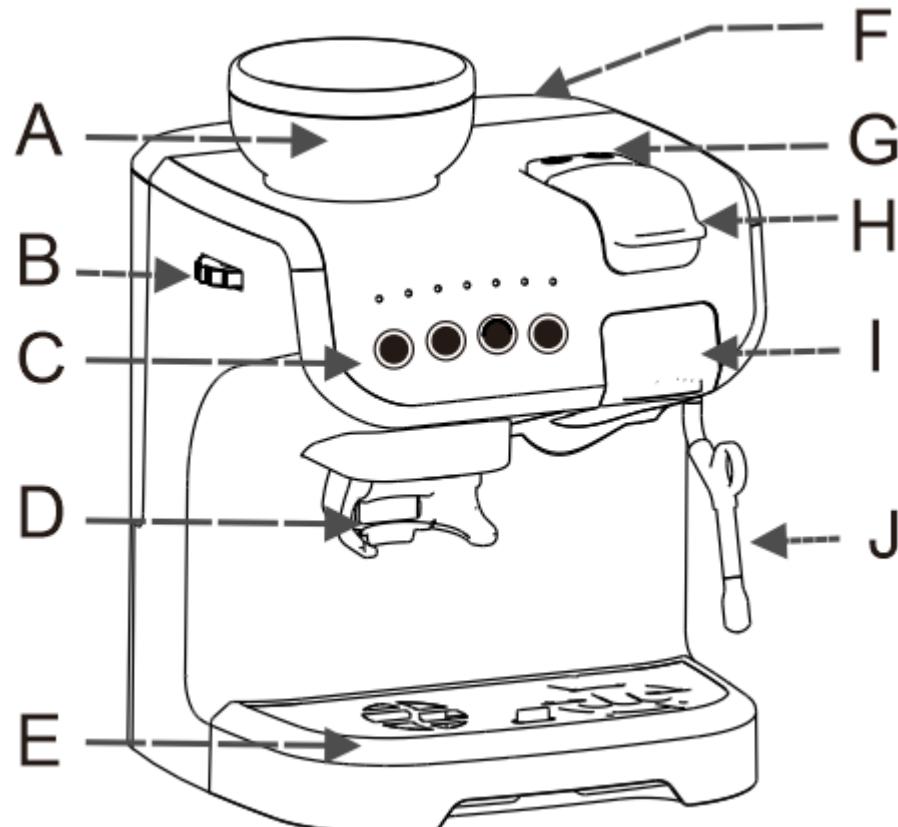

Asigurați-vă că aparatul este oprit când este scos din priză:

- Pericol de electrocutare! Nu atingeți ștecherul/priza/sursa de alimentare sau aparatul când mâinile sunt ude. Nu deconectați sursa de alimentare trăgând de cablul de alimentare.
- Pericol de opărire! Nu mișcați mașina în timp ce funcționează!
- Pericol de opărire! Nu atingeți părțile fierbinți ale aparatului (de exemplu, piese care fierb apă sau piese care distribuie apă în timpul funcționării).
- Pericol de opărire! A se păstra departe de jeturile de abur și apă!
- Pericol de opărire! Nu deschideți mânerul în timp ce aparatul funcționează
- Pericol de electrocutare! Nu scufundați aparatul, cablul de alimentare și nu conectați apă sau alte lichide!
- Asigurați-vă că aparatul este deconectat și răcit înainte de curățare sau service.
- Înainte de a vă conecta la sursa de alimentare, verificați dacă tensiunea locală de alimentare se potrivește cu tensiunea indicată.
- Aparatele electrice nu sunt destinate utilizării de către persoane cu handicap fizic, senzorial sau mental (inclusiv copii) sau de către persoane neexperimentate și needucate, cu excepția cazului în care au fost supravegheate sau instruite de o persoană responsabilă cu siguranța lor, iar adulții ar trebui să instruiască copiii să nu se joace cu aparatele electrice.
- Nu permiteți copiilor să folosească acest produs sau ca jucărie.

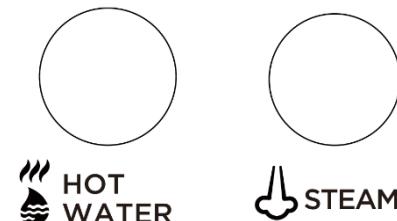

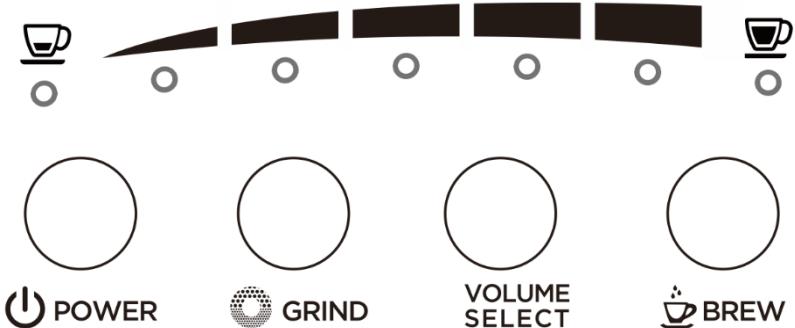

- Nu utilizați produsul dacă ștecherul, cablul sau produsul sunt deteriorate. Mergeți la un centru de service pentru inspecție cât mai curând posibil, nu modificați, dezasamblați sau reparați singuri.
- Acest produs este numai pentru uz casnic și nu poate fi utilizat în niciun alt scop.
- Vă rugăm să utilizați produsul pe o suprafață netedă, rezistentă la căldură și să nu-l utilizați într-un mediu umed sau praf. Nu utilizați produsul în apropierea flăcărilor deschise, a căldurii sau a stropilor de apă pentru a evita accidentele.
- Când produsul pare anormal, încetați imediat să îl utilizați.
- Nu acoperiți capacul superior în timp ce produsul este în funcțiune.
- Când produsul funcționează, acordați atenție vaporilor de apă, nu vă apropiați față de orificiul de evacuare a apei, pentru a nu face arsuri
- Nu mutați produsul în timp ce este în funcțiune pentru a evita accidentele.
- Vibrații ușoare vor apărea atunci când produsul este în funcțiune, rezultând o ușoară mișcare a ceștii de cafea, ceea ce este normal.
- Nu deschideți mânerul în timp ce produsul este în funcțiune
- Nu puneti degetele sau alte obiecte în ceașca de cafea pentru a evita accidentele!
- Nu lăsați produsul, cordonul și capsulele de cafea la îndemâna copiilor.
- Nu umpleți rezervorul cu apă fierbinte.
- Nu deconectați trăgând de cablul de alimentare.
- Nu atingeți cablul de alimentare cu mâinile ude
- Nu efectuați dezasamblarea produsului
- Produsul trebuie oprit sau deconectat înainte de curățare.
- Aparatele nu trebuie spălate direct în apă
- Nu-l utilizați în aer liber, evitați expunerea produsului la lumina directă a soarelui, rezistent la umiditate (nu-l scufundați în lichid), nu atingeți marginile ascuțite, nu atingeți aparatul cu mâinile ude și, dacă aparatul se udă, opriți imediat alimentarea principală..

- Verificați periodic dacă aparatelor electrice nu sunt deteriorate, dacă sunt deteriorate, vă rugăm să nu utilizați
- Conducta de abur

Capitolul 2: Descrierea componentelor

Capitolul 4: Metode de utilizare

Mașina trebuie clătită după prima utilizare sau după o perioadă lungă de neutilizare. Metoda de spălare este după cum urmează.

1

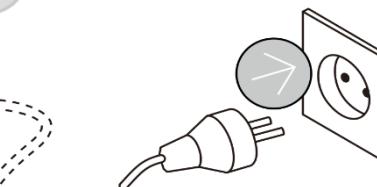

Metoda 1

1. Deschideți capacul rezervorului
2. Turnați nu mai mult de 2 litri de apă pură în rezervor

(temperatura apelor nu depășește)

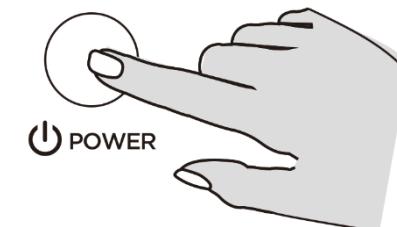

2

Conectați la o sursă de alimentare corespunzătoare

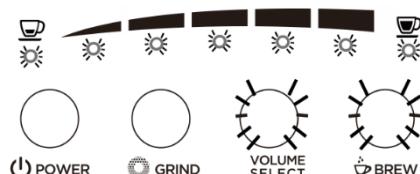

3

Apăsați pe butonul de alimentare al comutatorului

4

Situată 1

Buton cafea / buton de selectare a dimensiunii ceștii / lumină intermitentă, starea lipsei de apă a mașinii.

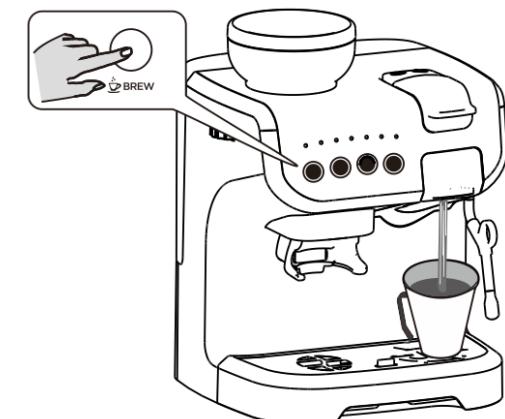

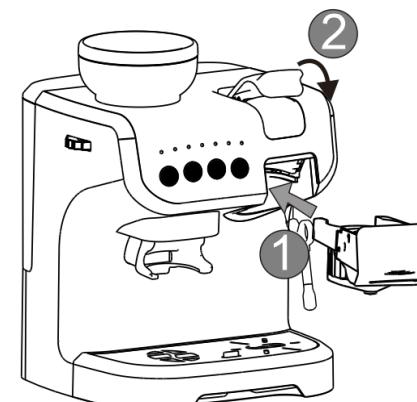

Apăsați butonul de cafea pentru a permite circuitului de apă să se

umele și lumina roșie să se stingă. Mașina intră în starea de

Buton de selectare a dimensiunii ceștii / Buton de preparare a cafelei / Clingește starea de preîncă

5

1. Introduceți ceașcă cu o capacitate mai mare de 100 ml deasupra capacului tăvii de apă reziduală și apăsați butonul de preparare a cafelei.
2. Mâner de închidere

Pregătirea boabelor de cafea

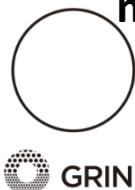

1

Asigurați-vă că recipientul de cafea este blocat înainte de a introduce boabele

măcinarea boabelor de cafea

2

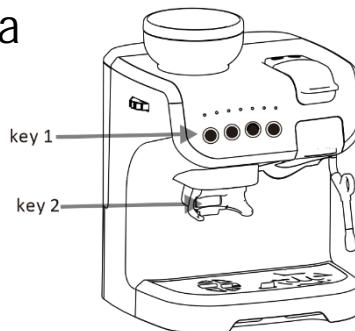

Taste funcționale

Cheia de selectare a **mărimii** cupei: pot fi selectate 7 dimensiuni de **cupă**.

5

1. răsuciți capacul paharului de preparare și
2. Introduceți accesoriul pentru cafea măcinată

1. Așezați o ceașcă cu o capacitate mai mare de 100 ml deasupra capacului tăvii de apă uzată și apăsați butonul de preparare a cafelei pentru a începe prenărarea cafelei

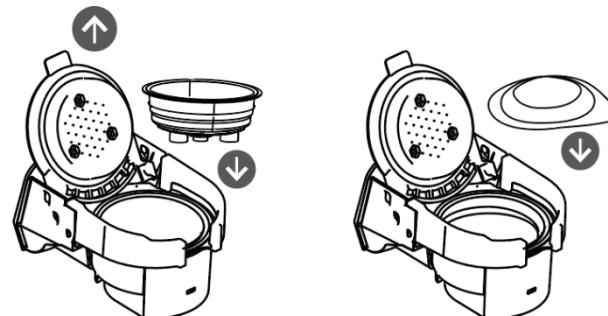

Pentru E.S.E coffee Pod

1

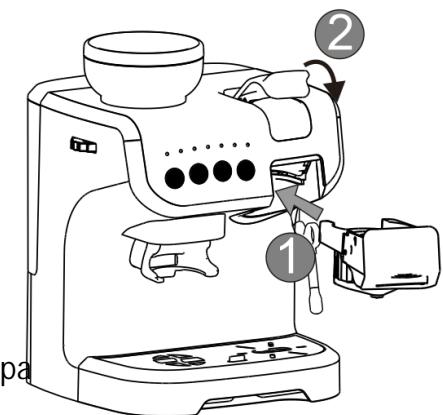

Deschideți mânerul pentru a scoate paharul de infuzare

2

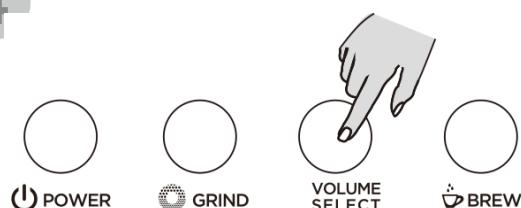

Puneți capsulele E.S.E coffee Pod în cupa de preparare

3

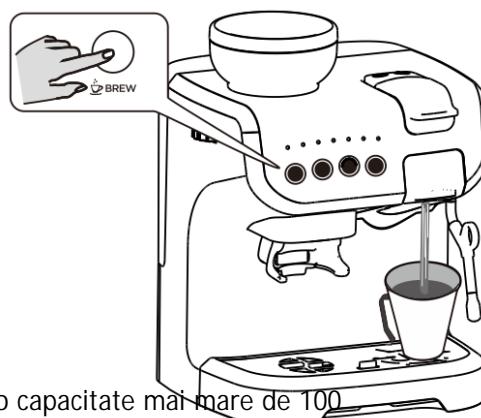

Introduceți cupa de preparare.
Apoi închideți mânerul.

4

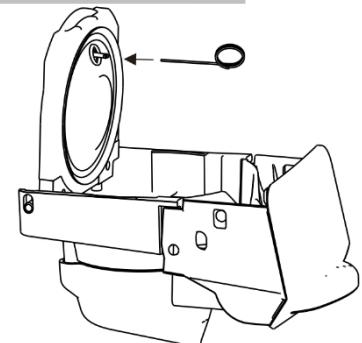

Cheia de selectare a **mărimii** cupei: pot fi selectate 7 dimensiuni de **cupă**.

5

1. Așezați o ceașcă cu o capacitate mai mare de 100 ml deasupra capacului tăvii de apă uzată și apăsați butonul de preparare a cafelei pentru a începe prepararea cafelei.

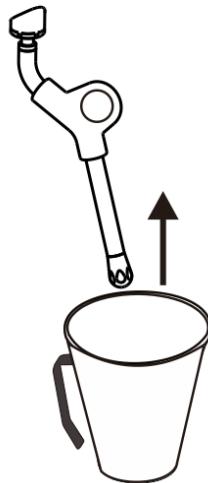

Prudență

Cupele de preparare tind să se înfunde, **așa că vă rugăm să le curătați** imediat.

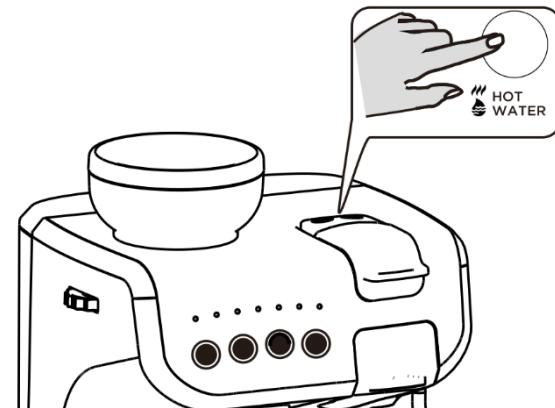

Producerea apei calde

1

Puneți paharul în conductă de abur.

2

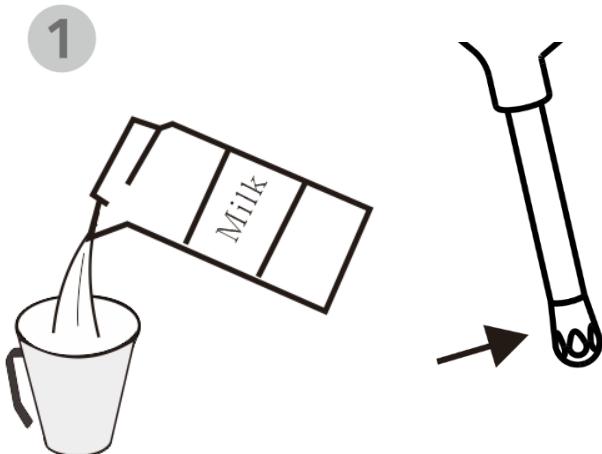

Apăsați butonul funcție
iei de apă caldă

3

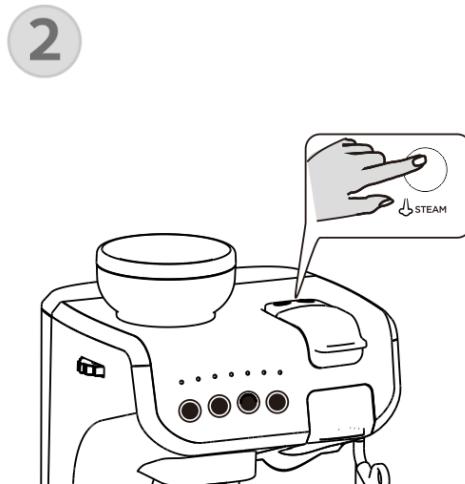

Când ați terminat de făcut apă caldă, apăsați
tasta pentru a termina de făcut apă fierbinte. (Asigurați-

Fabricarea spumei de lapte

Turnați nu mai puțin de 50 ml de lapte proaspăt în ceașcă.

Apăsați butonul de aburi.

3

Așezați conducta de abur la 1-2 cm de suprafața laptelui,
tubul din partea dreaptă a cupei într-un unghi
și așteptați să se formeze aburul.

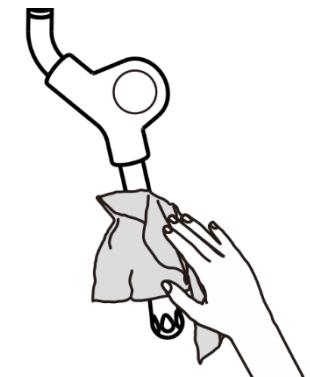

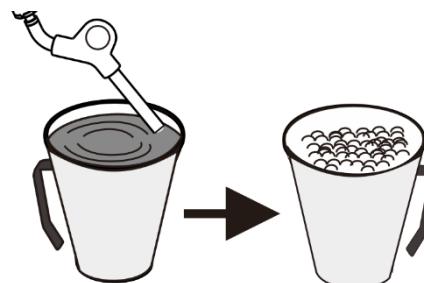

4

Coborâți încet paharul în timp ce bagheta de aburi învârte laptelul în sensul acelor de ceasornic. Acest lucru va aduce bagheta de abur înapoi la suprafața laptelui și va începe să amestece aerul în lapte. Utilizați bagheta de abur pentru a agita ușor suprafața laptelui și pentru a lăsa laptelul să se rotească la viteza potrivită.

Așezați bagheta de aburi pe partea laptelui la același nivel sau ușor sub suprafață și lăsați laptelul să continue să se învârtă și să se învârtă. Mențineți funcționarea până când laptelul ajunge la consistența dorită și paharul se simte fierbinte la atingere. Apăsați butonul de abur pentru a opri procesul de spumare a laptelui.)

Notă: Înainte de a scoate bagheta de abur din lapte, apăsați butonul de abur pentru a opri procesul de spumare a laptelui .

5

Capitolul 5: Modele de eficiență energetică

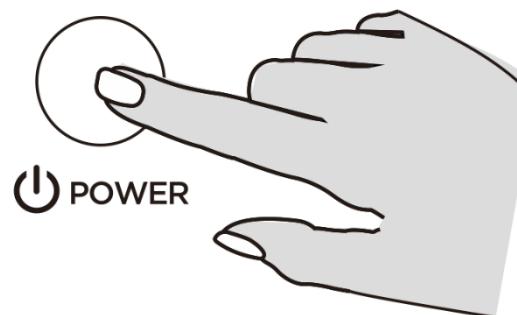

>15 minute

Modul de economisire a energiei

1. Mașina vine cu modul de economisire a energiei din fabrică

Mașina se oprește automat după 15 minute, toți indicatorii de funcție

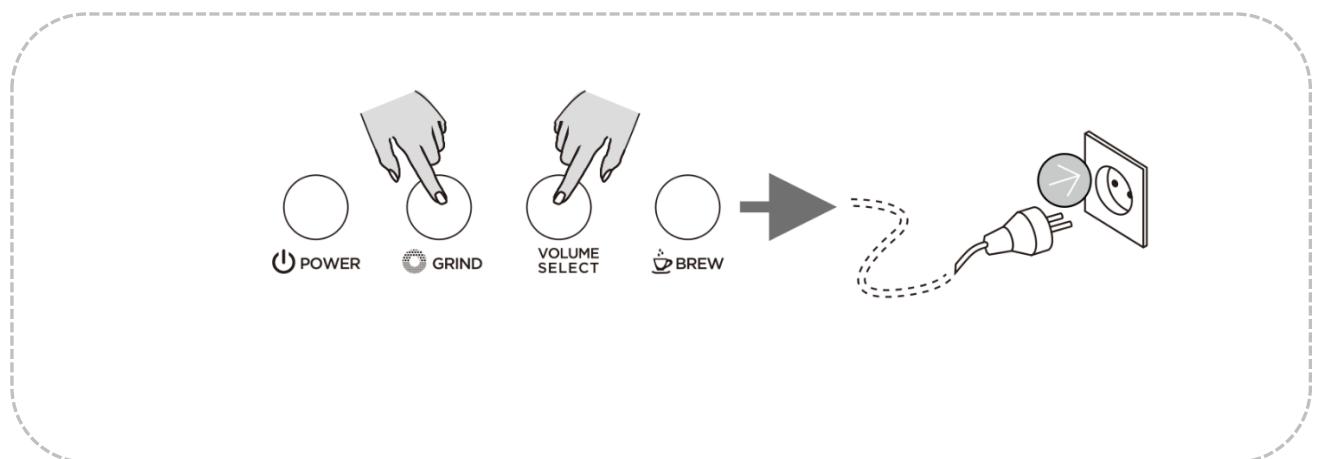

Setarea modului de economisire a energiei

Țineți apăsată tasta GRIND și tasta VOLUME SELECT în același timp, conectați și sursa de alimentare și porniți alimentarea.

Apăsați și tasta GRIND pentru a stinge lumina.

Modul de economisire a energiei anulat

Apăsați tasta GRIND key light on . Modul de economisire a energiei activat

Capitolul 6: Modele de

Atenție.
detartrare!

Datorită utilizării prelungite a mașinii, sistemul intern de circuit de apă al mașinii generează scară.

Dacă aparatul prezintă fenomene nedorite, cum ar fi o reducere **semnificativă** a **cantității** de cafea sau înfundare, aparatul trebuie detartrat utilizând modul de detartrare.

Funcția modului de detartrare

- 1 Așezați o cană în partea din față a aparatului, la locul de evacuare a apei și a aburului
2. Adăugați 1 litru de **apă pură** în rezervorul de apă și puneți cantitatea corespunzătoare de agent de detartrare.
3. Apăsați și mențineți apăsat butonul BREW coffee în același timp, fără a da drumul, conectați mufa de alimentare
4. Porniți tasta și lumina butonului BREW coffee, apăsați butonul BREW coffee, funcția de detartrare începe, volumul de lucru este de 1 litru de apă. Apoi apăsați butonul POWER pentru a ieși din funcția modului de detartrare.

Restabiliți setările din fabrică

1. Țineți apăsată (VOLUME SELECT) tasta de selectare a volumului paharului fără a da drumul mâinii, conectați

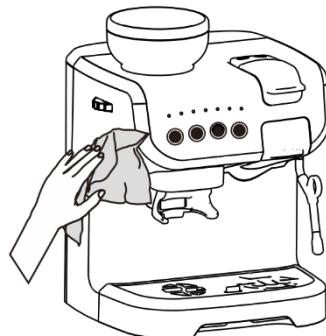

Capitolul 8: Curățenia

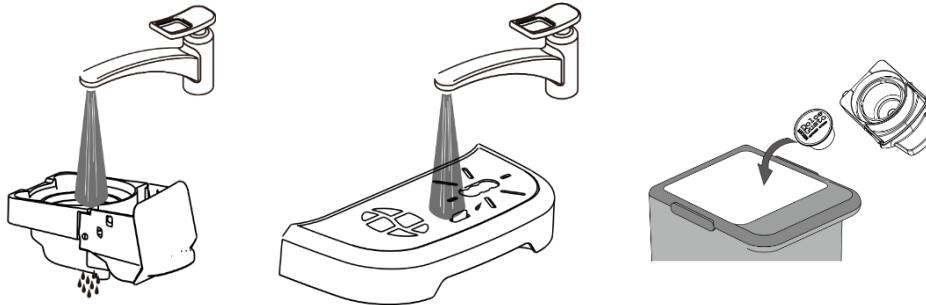

Atenție.

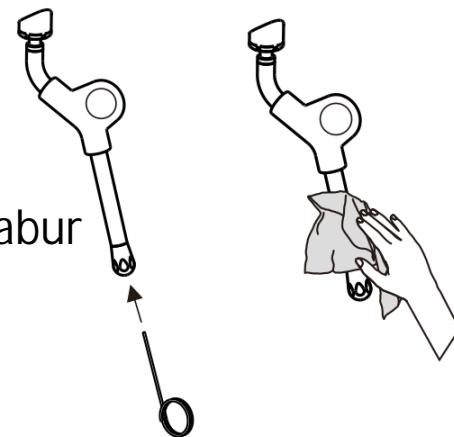

- 1 Nu scufundați niciodată aparatul de cafea în apă.
2. Asigurați-vă că aparatul este deconectat înainte de curățare.
3. Nu folosiți detergenți puternici, obiecte ascuțite, perii sau alte obiecte pentru a curăța aparatul de cafea.

Curățarea întregii
mașini

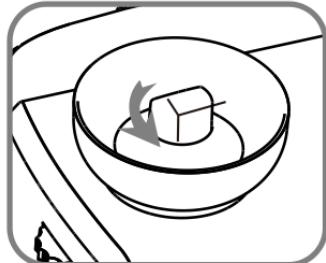

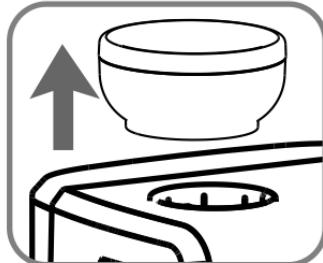

Curățarea baghetei de abur

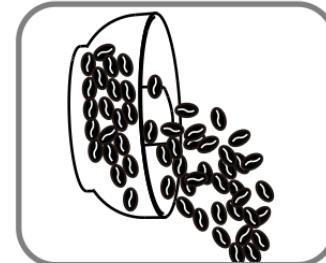

Curățarea cutiei de fasole **Vă rugăm să urmați pașii** de mai jos pentru a **curăța** cutia de fasole.

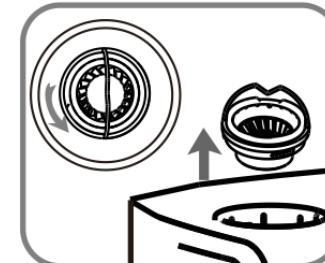

1. Deblocați cutia de

2. Scoateți cutia de
fasole

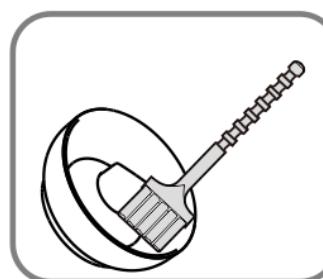

3. Golirea mai mult decât
boabele de cafea

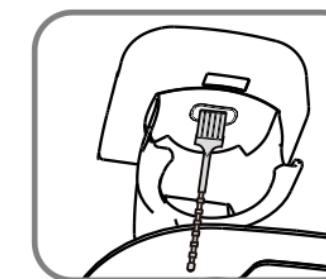

4. Deblocați râșnița în sens invers
acelor de ceasornic și ridicați-o

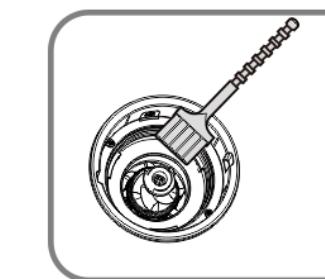

5. Curățați polizorul cu o
perie

6. Curățați cutia de fasole
cu o perie

7. Curățați orificiul de
suflare și pulsare cu o
perie

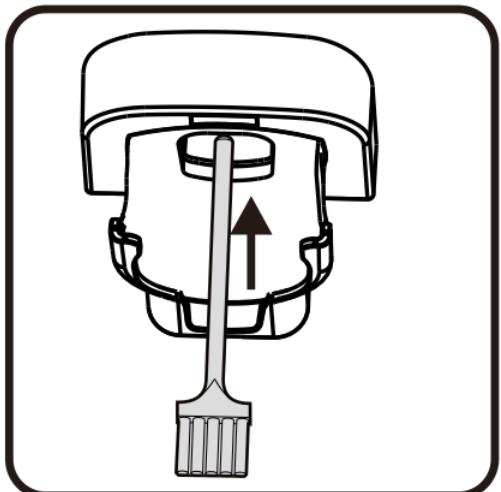

8. Curățarea cuțitelor de
suflare cu o perie

Tratamentul cu pulbere de conectare

Orificiul de evacuare a pulberii este blocat din cauza diferenței de boabe de cafea a utilizatorului, a funcționării insuficient de uscate sau necorespunzătoare.

Urmați pașii pentru curățare

Solve the coffee powder blocking

1. Unlock the bean box.

2. Remove the bean box.

3. Pour out the excess coffee beans.

4. Unlock the grinder counterclockwise and take it out.

5. Clean the grinder with the brush.

6. Remove nut and gasket clockwise.

7. Clean the sharpener and wheel with the brush.

8. Clean the grinding chamber with the brush.

2. Scoate și pensula pentru pulbere pentru a curăța canalul de evacuare a pulberii

Capitolul IX: mașina nu ieșe din metoda de tratare a apei

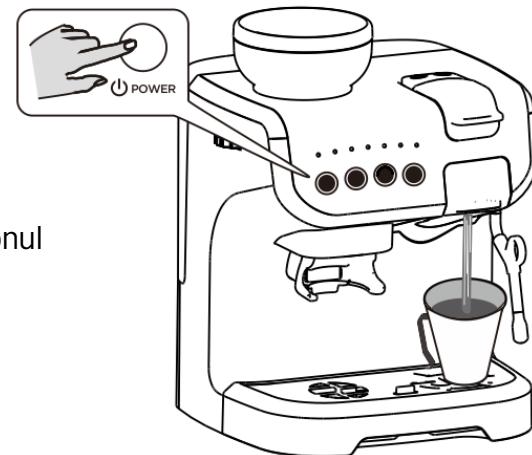

Prudență.

1. Prima utilizare a unei **mașini** noi.
2. perioade prelungite de neutilizare.
3. Lipsa apei în rezervorul de **apă** în timpul **funcționării**.

Va exista o **șansă** ca **mașina să nu poată** pompa fenomenul de **apă**, **există** 2 tipuri de **soluții** vezi figura (metoda 1 / metoda 2)

Metoda 2

Umpleți aparatul cu apă utilizând butonul "pompă manuală" atașată la mașină.

Metoda 1

Tineți apăsat butonul ALIMENTARE în timp ce aparatul este în modul standby

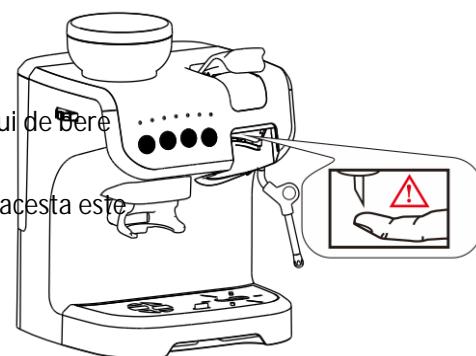

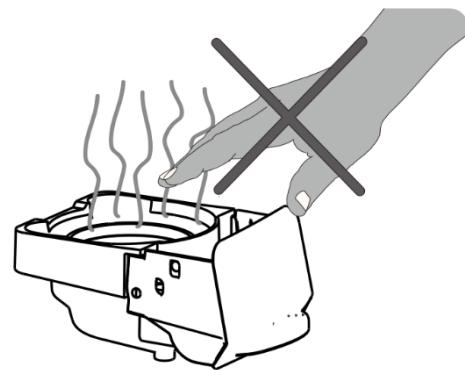

Capitolul 10: Precauții

Este interzisă turnarea directă a apei
pe mașină

Ferește-te de căldură.

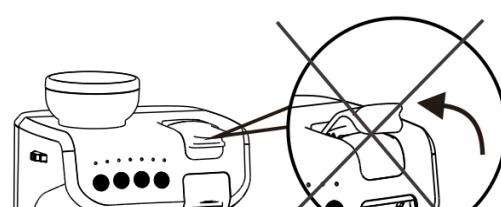

Lamă ascuțită în interiorul locației paharului de bere

Când paharul de preparare este îndepărtat, acesta este

interzis să punetă mâinile în mașină.

Καφετιέρα με ενσωματωμένο μύλο άλεσης καφέ

Οδηγίες χρήσης

Διαβάστε προσεκτικά τις παρακάτω οδηγίες και κρατήστε τις για μελλοντική χρήση!

Κεφάλαιο 1: Προφυλάξεις για ασφαλή χρήση

Κεφάλαιο 1: Προφυλάξεις για ασφαλή χρήση

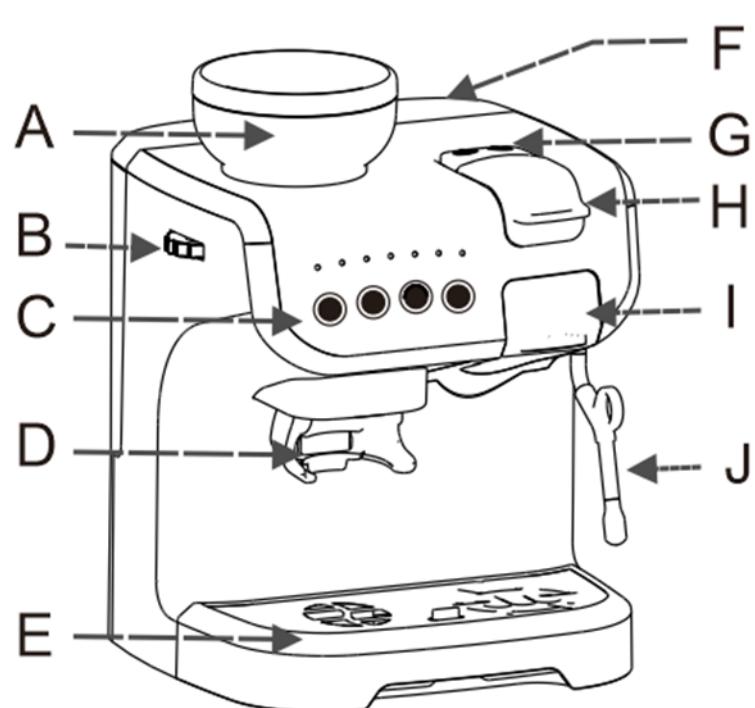

- Διαβάστε προσεκτικά αυτό το εγχειρίδιο πριν από τη χρήση και λάβετε υπόψη τα εξής:
- Βεβαιωθείτε ότι το μηχάνημα είναι απενεργοποιημένο:
- Κίνδυνος ηλεκτροπληξίας! Μην αγγίζετε το βύσμα/την πρίζα/το ρεύμα ή το μηχάνημα όταν τα χέρια σας είναι βρεγμένα. Μην απενεργοποιείτε την

τροφοδοσία τραβώντας το καλώδιο τροφοδοσίας.

- Κίνδυνος εγκαύματος! Μην μετακινείτε το μηχάνημα ενώ λειτουργεί!
- Κίνδυνος καύσης! Μην αγγίζετε θερμά μέρη του μηχανήματος (π.χ. εξαρτήματα που βράζουν νερό ή εξαρτήματα που εκπέμπουν νερό κατά τη λειτουργία).
- Κίνδυνος εγκαύματος! Κρατήστε το μακριά από πίδακες ατμού και νερού!
- Κίνδυνος καύσης! Μην ανοίγετε τη λαβή ενώ λειτουργεί το μηχάνημα
- Κίνδυνος ηλεκτροπληξίας! Μην βυθίζετε το μηχάνημα, το καλώδιο τροφοδοσίας και μην βάζετε νερό ή άλλα υγρά! Βεβαιωθείτε ότι το μηχάνημα είναι απενεργοποιημένο και ψύχεται πριν από τον καθαρισμό ή το σέρβις.
- Πριν συνδεθείτε στο τροφοδοτικό, ελέγχτε ότι η τοπική τάση τροφοδοσίας αντιστοιχεί στην καθορισμένη τάση.
- Οι ηλεκτρικές συσκευές δεν προορίζονται για χρήση από άτομα με σωματικές, αισθητηριακές ή διανοητικές αναπηρίες (συμπεριλαμβανομένων των παιδιών) ή από άπειρα και αμόρφωτα άτομα, εκτός εάν επιβλέπονται ή καθοδηγούνται από υπεύθυνο άτομο υπεύθυνο για την ασφάλειά τους και οι ενήλικες πρέπει να καθοδηγούν τα παιδιά να μην παίζουν με ηλεκτρικές συσκευές.
- Μην επιτρέπετε στα παιδιά να χρησιμοποιούν αυτό το προϊόν ή ως παιχνίδι.
- Μη χρησιμοποιείτε το προϊόν όταν το βύσμα, το καλώδιο ή το προϊόν είναι κατεστραμμένο. Πηγαίνετε σε ένα κέντρο σέρβις για επιθεώρηση το συντομότερο δυνατό, μην τροποποιείτε, αποσυναρμολογείτε ή επισκευάζετε μόνοι σας.
- Αυτό το προϊόν προορίζεται μόνο για οικιακή χρήση και δεν μπορεί να χρησιμοποιηθεί για οποιονδήποτε άλλο σκοπό.
- Χρησιμοποιήστε το προϊόν σε λεία, ανθεκτική στη θερμότητα επιφάνεια και μην το χρησιμοποιείτε σε περιβάλλον με υγρασία ή σκόνη. Μη χρησιμοποιείτε το προϊόν κοντά σε ανοιχτή φλόγα, θερμότητα ή πιτσίλισμα νερού για να αποφύγετε ατυχήματα.
- **Όταν το προϊόν φαίνεται ασυνήθιστο, σταματήστε να το χρησιμοποιείτε αμέσως.**
- Μην καλύπτετε το πάνω καπάκι ενώ το προϊόν βρίσκεται σε λειτουργία.
- Όταν το προϊόν λειτουργεί, προσέξτε τους υδρατμούς, μην βάζετε το πρόσωπό σας κοντά στην έξοδο νερού, για να μην δημιουργηθούν εγκαύματα.
- Μην μετακινείτε το προϊόν ενώ βρίσκεται σε λειτουργία για αποφυγή ατυχημάτων.
- Μικρές δονήσεις θα συμβούν όταν το προϊόν είναι σε λειτουργία, με αποτέλεσμα μια μικρή κίνηση του φλιτζανιού καφέ, η οποία είναι φυσιολογική.
- Μην ανοίγετε τη λαβή ενώ το προϊόν λειτουργεί
- Μην βάζετε τα δάχτυλά σας ή άλλα αντικείμενα στο κύπελλο παρασκευής για να αποφύγετε ατυχήματα!
- Φυλάσσετε το προϊόν, το καλώδιο και τις κάψουλες καφέ μακριά από παιδιά.
- Μην γεμίζετε τη δεξαμενή με ζεστό νερό.
- Μην αποσυνδέετε τραβώντας το καλώδιο τροφοδοσίας.
- Μην αγγίζετε το καλώδιο τροφοδοσίας με βρεγμένα χέρια
- Μην αποσυναρμολογείτε το προϊόν
- **Στο προϊόν πρέπει να απενεργοποιηθεί ή να αποσυνδεθεί από την πρίζα πριν από τον καθαρισμό.**
- Οι συσκευές δεν πρέπει να πλένονται απευθείας με νερό
- Μην το χρησιμοποιείτε σε εξωτερικούς χώρους, αποφύγετε τη θέρμανση του προϊόντος, την άμεση ηλιακή ακτινοβολία, την υγρασία (μην το βυθίζετε σε

- υγρό), μην αγγίζετε τις αιχμηρές άκρες, μην αγγίζετε το μηχάνημα με βρεγμένα χέρια και εάν το μηχάνημα βραχεί, κλείστε αμέσως την κύρια παροχή ρεύματος.
- Ελέγχετε τακτικά τις ηλεκτρικές συσκευές για ζημιές, εάν έχουν υποστεί ζημιά, μην τις χρησιμοποιείτε.

Κεφάλαιο 3: Περιγραφή Πίνακα Ελέγχου:

Περιγραφή Πίνακα Ελέγχου					
	Μπουτόνι	Περιγραφή της λειτουργίας		Μπουτόνι	Περιγραφή της λειτουργίας
POWER	Κουμπί ενεργοποίησης/απενεργοποίησης	Άνοιγμα και απενεργοποίηση της καφετιέρας	BREW	Κουμπί παρασκευής καφέ	Αφού επιλέξετε το επιθυμητό μέγεθος φλιτζανιού, πατήστε το κουμπί παρασκευής καφέ και η μηχανή θα ξεκινήσει την παρασκευή καφέ.
GRIND	Κουμπί áλεσης καφέ	Πατήστε το κουμπί áλεσης κόκκων για να ξεκινήσετε το μηχάνημα áλεσης κόκκων και, στη συνέχεια, πατήστε το κουμπί για να σταματήσετε την áλεση των κόκκων	HOT WATER	Κουμπί ζεστού νερού	Τοποθετήστε το ποτήρι (όχι λιγότερο από 300 ml) στην έξοδο του σωλήνα ατμού και, στη συνέχεια, πατήστε το κουμπί για τη λειτουργία ζεστού νερού, πατήστε ξανά το κουμπί για να σταματήσετε τη διαρροή νερού

VOLUME SELECT	Κουμπί για να επιλέξετε την ποσότητα καφέ	Επιλέξτε την επιθυμητή ποσότητα καφέ	 STEAM	Κουμπί ατμού	Τοποθετήστε ένα φλιτζάνι 1/3 γεμάτο γάλα κάτω από την έξοδο ατμού. Πατήστε το κουμπί αφρού. Όταν επιτευχθεί το επιθυμητό επίπεδο αφρού
----------------------	---	--------------------------------------	---	--------------	--

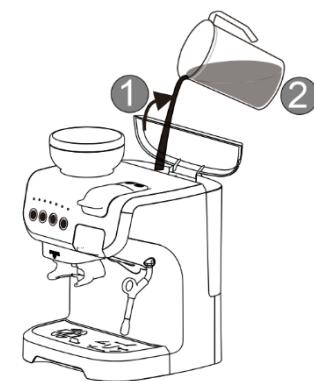

Κεφάλαιο 4: Τρόπος χρήσης:

Το μηχάνημα πρέπει να ξεπλυθεί μετά την πρώτη χρήση ή μετά από μακρά περίοδο μη χρήσης. Η μέθοδος πλύσης έχει ως εξής:

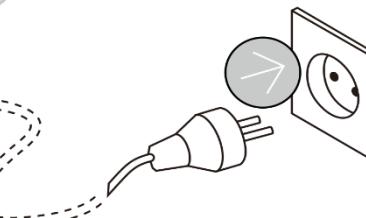

1

Μέθοδος 1

1. Σηκώστε το κάλυμμα της δεξαμενής
2. Ρίξτε όχι περισσότερο από 2 λίτρα καθαρού νερού στη δεξαμενή (θερμοκρασία νερού όχι μεγαλύτερη από 35 ° C)

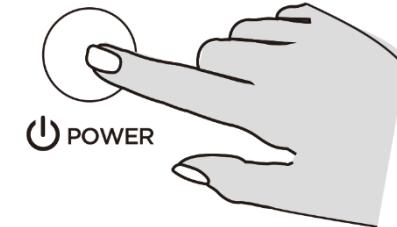

2

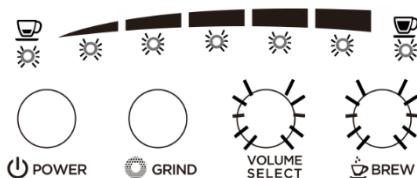

Συνδέστε το φις στην πρίζα

3

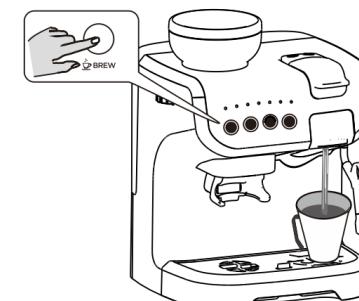

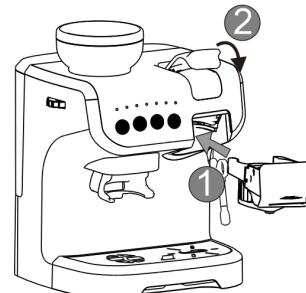

Πατήστε το κουμπί ON.

4

5

Όταν επιλέγετε το κουμπί για την ποσότητα καφέ, εάν υπάρχει φως που αναβοσβήνει, αυτό σημαίνει ότι η ποσότητα νερού είναι μικρή. Συμπληρώστε νερό. Όταν σβήσει η κόκκινη λυχνία, το μηχάνημα βρίσκεται σε κατάσταση αναμονής.

1. Τοποθετήστε την κάψουλα καφέ

1. Τοποθετήστε φλιτζάνι χωρητικότητας άνω των 100 ml πάνω από το καπάκι του δίσκου λυμάτων και πατήστε το κουμπί παρασκευής καφέ.

2. Κλείστε τη λαβή

Κουμπί επιλογής μεγέθους φλιτζανιού / Κουμπί παρασκευής καφέ / Αναβοσβήνει, Κατάσταση προθέρμανσης

Παρασκευή καφέ με κόκκους καφέ

Βεβαιωθείτε ότι το μπολ στο οποίο τοποθετούνται οι κόκκοι καφέ έχει τοποθετηθεί σωστά στη θέση του.

1

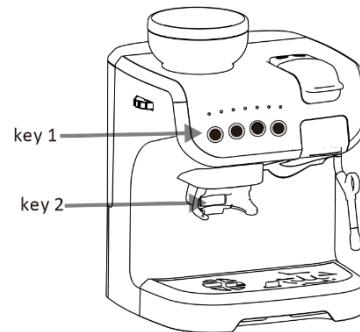

1. Όταν το μπολ κόκκων είναι ξεκλείδωτο, το κόκκινο φως ανάβει και η λειτουργία λείανσης κόκκων δεν λειτουργεί σε εκείνο το σημείο.

2. Όταν βρίσκεται σε κλειδωμένη κατάσταση, το μπλε φως ανάβει, η λειτουργία λείανσης κόκκων λειτουργεί ήδη.

2

Λειτουργικά κουμπιά για άλεση καφέ

1. Πατήστε OK για να ξεκινήσει η λείανση. Πατήστε OK για να σταματήσετε τη λείανση.

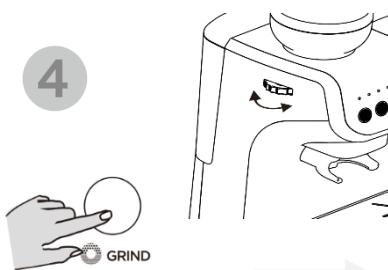

Πλήκτρο 2: Χρησιμοποιήστε το κύπελλο παρασκευής για να πιέσετε προς τα εμπρός και να ξεκινήσετε τη λειτουργία άλεσης κόκκων καφέ, πατήστε ξανά το πλήκτρο ελένχου 2 για να σταματήσετε τη λειτουργία άλεσης κόκκων καφέ.

3

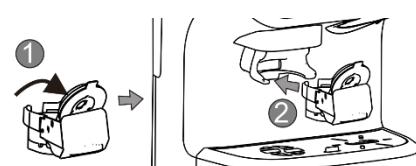

Ρίξτε όχι περισσότερο από 150g. Καφές στο μπολ

4

Πατήστε OK για να ξεκινήσετε τη λείανση
Με το κουμπί επιλογής βαθμού λείανσης, ρυθμίστε σύμφωνα με την επιλογή σας.

5

- Ανοίξτε το καπάκι
- Τοποθετήστε τον αλεσμένο καφέ

Πατήστε OK για να ξεκινήσει η λείανση.

Όταν φτάσετε στην επιθυμητή ποσότητα καφέ πατήστε

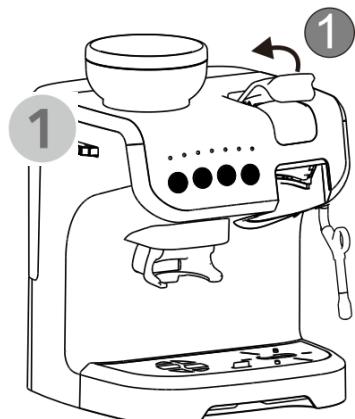

OK για να σταματήσετε τη λειτουργία

- ! Προσοχή: εάν το κουμπί λείανσης είναι ενεργοποιημένο αλλά δεν λειτουργεί για 13 δευτερόλεπτα, θα απενεργοποιηθεί αυτόματα.
- Πιέστε ξανά το κύπελλο παρασκευής, πιέστε και η λειτουργία λείανσης θα ξεκινήσει ξανά.

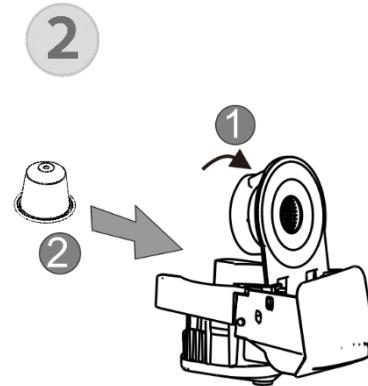

Σημείωση:

Όταν ο χρόνος λείανσης διαρκεί 4 λεπτά (άλεση κόκκων περίπου 6-7 φορές), το κουμπί λείανσης κόκκων ανάβει κόκκινο, το μηχάνημα σταματά τη λειτουργία λείανσης κόκκων, αφήστε το μηχάνημα να ξεκουραστεί για 8 λεπτά μετά την επαναφορά της λειτουργίας λείανσης στο φυσιολογικό

Για κάψουλα Nespresso (ή κάψουλα Dolce Gusto) Κούπ

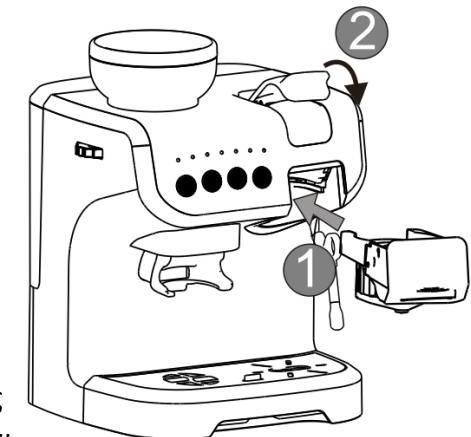

Ανοίξτε τη λαβή για να αφαιρέσετε το δοχείο

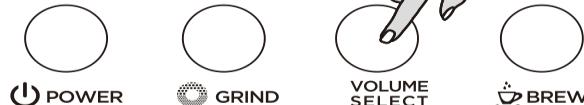

Τοποθετήστε κάψουλα Nespresso (ή Dolce Gusto).

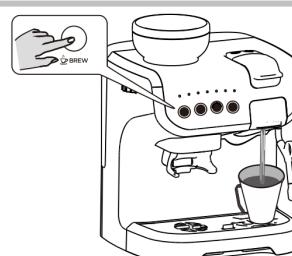

Τοποθετήστε το δοχείο της κάψουλας και αφήστε τη λαβή

4

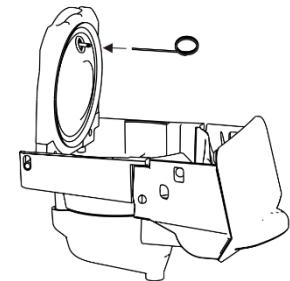

5

Προσοχή: το δοχείο παρασκευής είναι συχνά βουλωμένο. Καθαρίστε το τακτικά!

**Κλειδί επιλογής μεγέθους κυπέλλου:
μπορούν να επιλεγούν 7 μεγέθη
φλιτζανιών.**

1. Τοποθετήστε ένα φλιτζάνι χωρητικότητας άνω των 100 ml στο καπάκι του δίσκου λυμάτων και πατήστε το κουμπί παρασκευής καφέ.

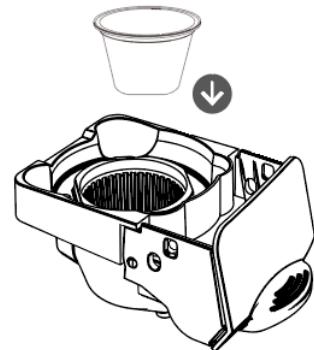

Για κάψουλες LAVAZZA Blue

1

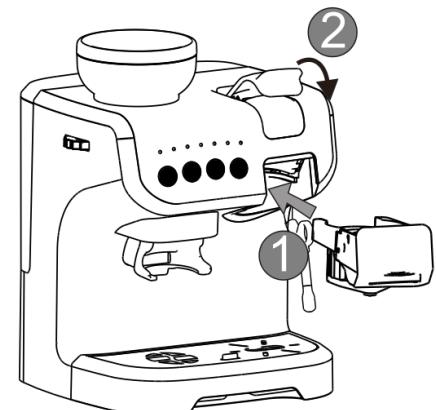

Ανοίξτε τη λαβή για να αφαιρέσετε
το δοχείο παρασκευής

2

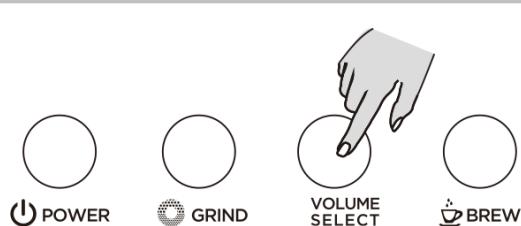

Τοποθετήστε μια κάψουλα
LAVAZZA Blue στον
περιέκτη παρασκευής

3

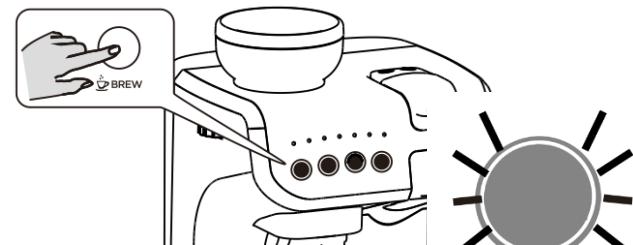

Τοποθετήστε
το δοχείο
παρασκευής
και κλείστε τη
λαβή

4

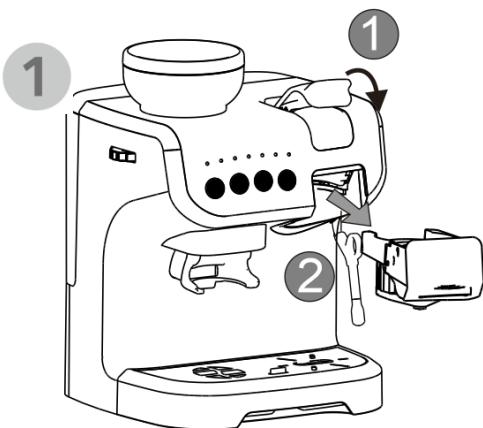

5

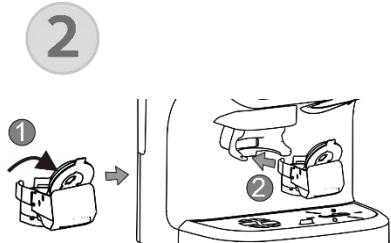

Επιλέγοντας την ποσότητα καφέ-7 επιλογές

- Τοποθετήστε ένα φλιτζάνι χωρητικότητας άνω των 100 ml στο καπάκι του δίσκου λυμάτων και πατήστε το κουμπί της καφετιέρας για να ξεκινήσετε την παρασκευή καφέ.

Για αλεσμένο καφέ

Ανοίξτε τη λαβή για να αφαιρέσετε το δοχείο παρασκευής

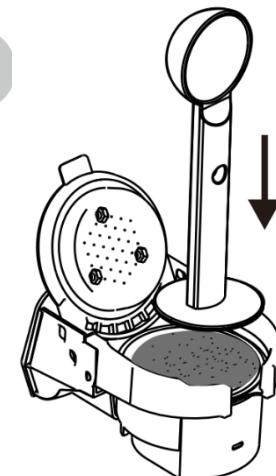

2
Πιέστε το κύπελλο παρασκευής προς τα εμπρός για να ενεργοποιήσετε τη λειτουργία άλεσης κόκκων στην επιθυμητή ποσότητα σκόνης καφέ και, στη συνέχεια, πιέστε ξανά το κύπελλο παρασκευής για να σταματήσετε την άλεση κόκκων.

! Σημείωση:1 Ενεργοποιήστε το κουμπί λειτουργίας άλεσης κόκκων, χωρίς καμία λειτουργία 13 δευτερόλεπτα μετά την αυτόματη διακοπή άλεσης φασολιών

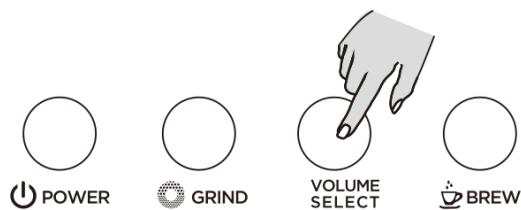

2. Σπρώξτε ξανά το κύπελλο παρασκευής προς τα εμπρός και πιέστε το GRIND και πάλι για να σταματήσει το άλεσμα.

1. Πατήστε OK για να ξεκινήσει η λείανση. Όταν φτάσετε στην επιθυμητή ποσότητα, πατήστε για να σταματήσετε τη διαδικασία.

Πιέστε τον αλεσμένο καφέ με ένα κουτάλι καφέ

4

Επιλέξτε την ποσότητα καφέ - 7 επιλογές.

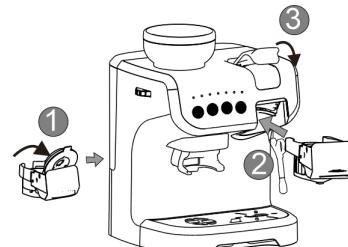

1

Ανοίξτε τη λαβή για να αφαιρέσετε το δοχείο παρασκευής

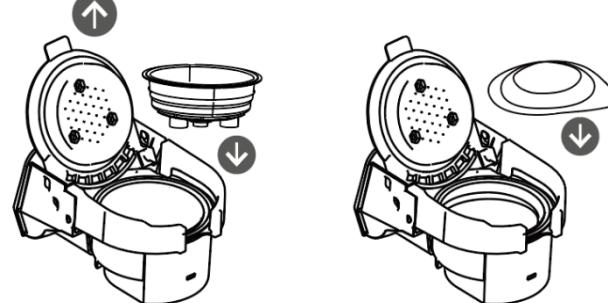

5

1. Επιστρέψτε το καπάκι στο δοχείο ζυθοποίας και
2. Τοποθετήστε στην τρύπα του αλεσμένου καφέ

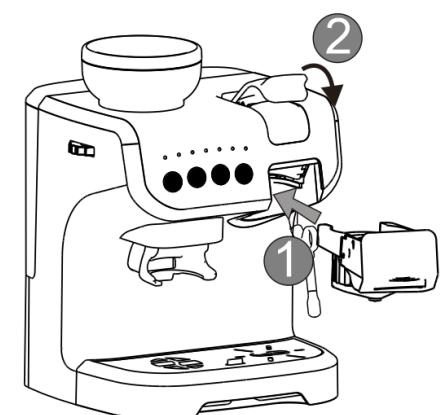

Σχετικά με την E.S.E Coffee

2

Τοποθετήστε το E.S.E Coffee Pod στο δοχείο παρασκευής

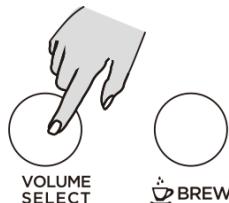

3

Τοποθετήστε το δοχείο παρασκευής και κλείστε τη λαβή

. Τοποθετήστε ένα φλιτζάνι χωρητικότητας άνω των 100 ml στο καπάκι του δίσκου λυμάτων και πατήστε το κουμπί παρασκευής καφέ για να ξεκινήσετε την παρασκευή καφέ.

4

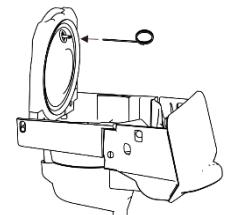

Επιλέξτε την ποσότητα καφέ - 7 επιλογές.

5

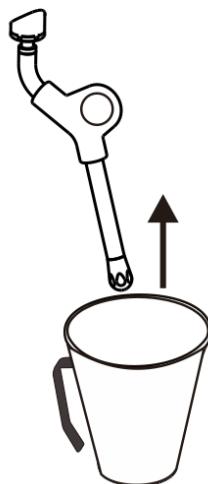

- Τοποθετήστε ένα φλιτζάνι χωρητικότητας άνω των 100 ml στο καπάκι του δίσκου λυμάτων και πατήστε το κουμπί της καφετιέρας για να ξεκινήσετε την παρασκευή καφέ.

Προσοχή: το δοχείο παρασκευής φράσσεται συχνά. Καθαρίστε το τακτικά!

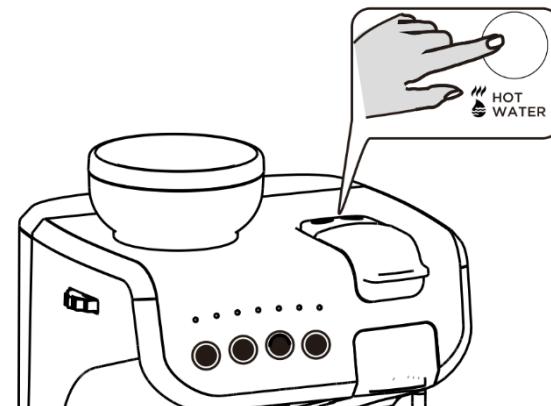

Ζεστό νερό

1

Βάλτε το κύπελλο στο σωλήνα ατμού.

2

Πατήστε το κουμπί για τη λειτουργία ζεστού νερού

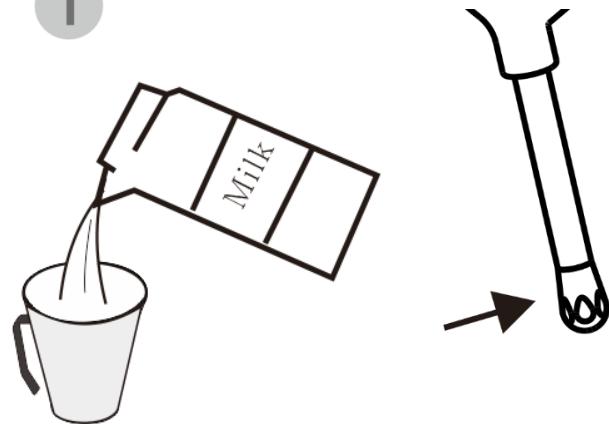

3

Όταν φτάσει στην επιθυμητή ποσότητα ζεστού νερού,
πιέστε OK HOT WATER για να σταματήσετε τη διαρροή
νερού. (Βεβαιωθείτε ότι υπάρχουν περισσότερα από
150 ml στη δεξαμενή νερού.)

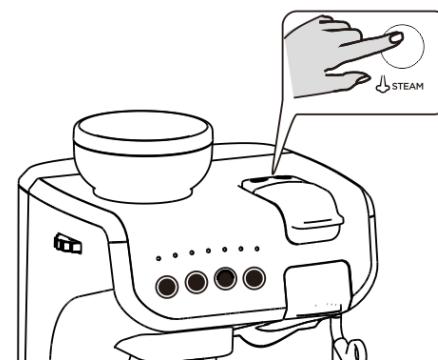

Παρασκευή αφρού γάλακτος

1

2

Ρίξτε στο ποτήρι τουλάχιστον 50 ml γάλα.

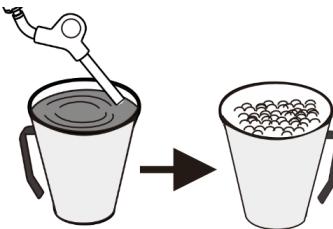

Πατήστε το κουμπί ατμού.

3

Τοποθετήστε το σωλήνα ατμού 1-2 cm από την επιφάνεια του γάλατος,
Πλησιάστε τη θέση 3 ώρες στη δεξιά πλευρά του κυπέλλου και περιμένετε να σχηματιστεί ατμός.

4

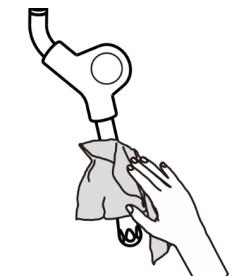

Χαμηλώστε αργά το κύπελλο καθώς ο σωλήνας ατμού περιστρέφει το γάλα δεξιόστροφα. Αυτό θα επαναφέρει τον σωλήνα ατμού στην επιφάνεια του γάλακτος και θα αρχίσει να αναμιγνύει αέρα στο γάλα. Χρησιμοποιήστε τη ράβδο ατμού για να ανακινήσετε απαλά την επιφάνεια του γάλακτος και αφήστε το γάλα να στροβιλιστεί με τη σωστή ταχύτητα.

Τοποθετήστε το σωλήνα ατμού στην πλευρά του γάλακτος στο ίδιο επίπεδο ή λίγο κάτω από την επιφάνεια και αφήστε το γάλα να συνεχίσει να στροβιλίζεται και να στροβιλίζεται. Συνεχίστε να εργάζεστε μέχρι το γάλα να φτάσει στην επιθυμητή συνοχή και το ποτήρι να είναι ζεστό στην αφή.

Πατήστε το κουμπί ατμού για να σταματήσετε τη διαδικασία δημιουργίας αφρού γάλακτος.) Πατήστε το κουμπί ατμού για να σταματήσετε τη διαδικασία σχηματισμού αφρού γάλακτος.

Σημείωση: Πριν αφαιρέσετε τη ράβδο ατμού από το γάλα, πατήστε το κουμπί ατμού για να σταματήσετε τη διαδικασία σχηματισμού αφρού γάλακτος.

5

Κεφάλαιο 5: Μοντέλα ενεργειακής απόδοσης

>15 λεπτά

Λειτουργία εξοικονόμησης ενέργειας

1. Το μηχάνημα παρέχεται με λειτουργία εξοικονόμησης ενέργειας από το εργοστάσιο.

Το μηχάνημα απενεργοποιείται αυτόματα μετά από 15 λεπτά.

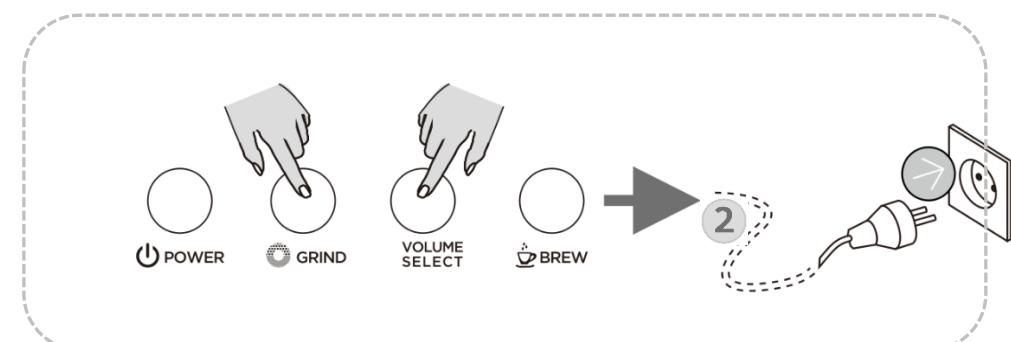

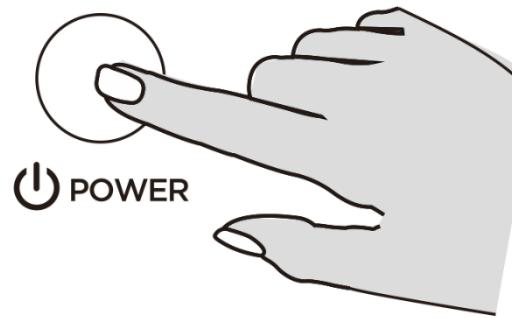

2. Όταν το μηχάνημα βρίσκεται σε κατάσταση εκτός λειτουργίας, πατήστε ξανά το κουμπί ON και θα εισέλθει σε κατάσταση αναμονής.

Ρύθμιση λειτουργίας εξοικονόμησης ενέργειας

Πατήστε παρατεταμένα το κουμπί GRIND και το κουμπί VOLUME SELECT ταυτόχρονα, ενεργοποιήστε το ρεύμα και συνδέστε το στην πρίζα.

Πατήστε το κουμπί GRIND για να σβήσετε το φως. Η λειτουργία εξοικονόμησης ενέργειας ακυρώθηκε

Πατήστε το πλήκτρο GRIND. Η λειτουργία εξοικονόμησης ενέργειας είναι ενεργοποιημένη. Πατήστε ξανά POWER για έξοδο από τη ρύθμιση εξοικονόμησης ενέργειας

Κεφάλαιο 6: Μοντέλα αφαλάτωσης

Προσοχή.

Κατά τη διάρκεια της παρατεταμένης χρήσης του μηχανήματος, το εσωτερικό σύστημα νερού του μηχανήματος παράγει άλατα.

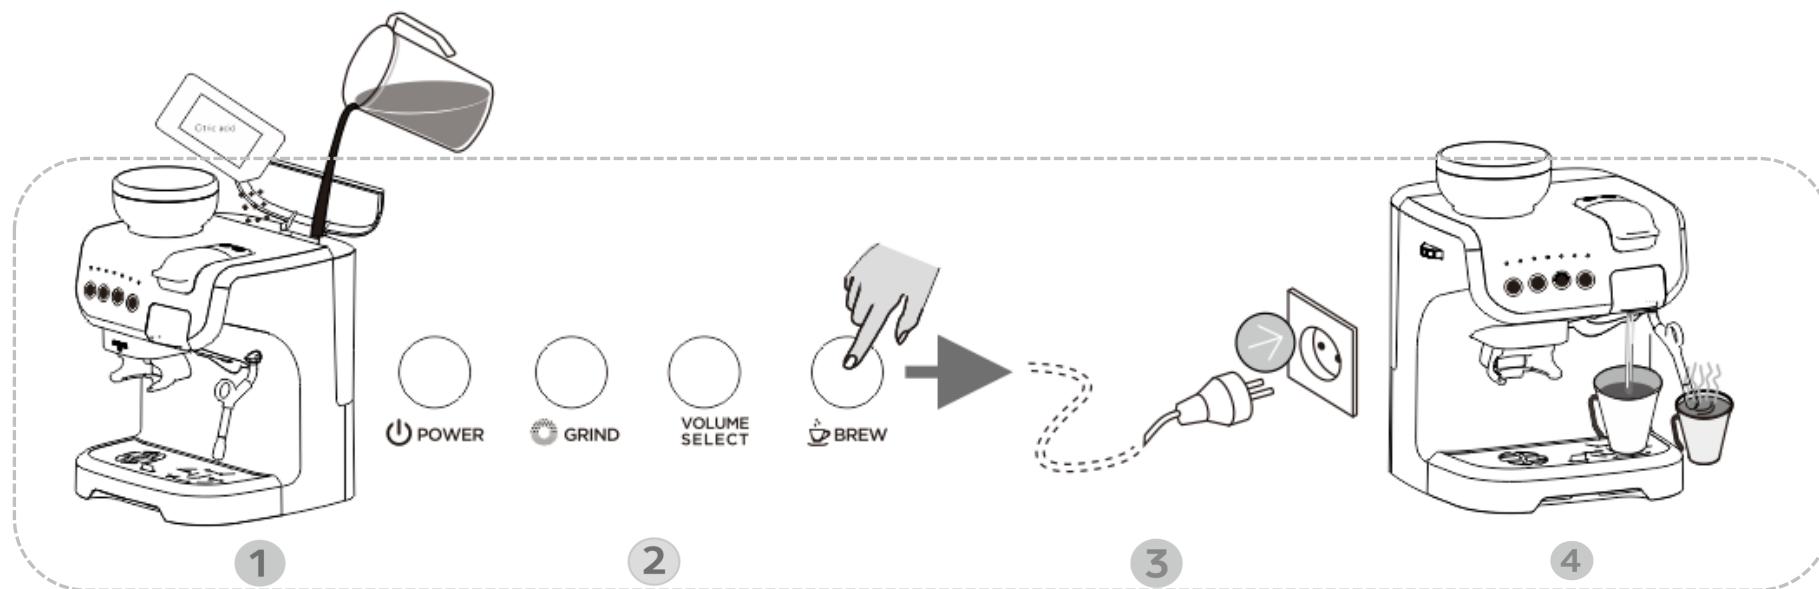

Εάν το μηχάνημα παρουσιάζει ανεπιθύμητα φαινόμενα, όπως σημαντική μείωση της ποσότητας καφέ ή απόφραξη, το μηχάνημα πρέπει να αφαιρεθεί από την κλίμακα χρησιμοποιώντας τη λειτουργία αφαλάτωσης.

Λειτουργία αφαλάτωσης

- 1 Τοποθετήστε ένα φλιτζάνι μπροστά από το μηχάνημα στη θέση της εξόδου νερού και του ατμού.
- 2 Προσθέστε 1 λίτρο καθαρού νερού στη δεξαμενή νερού και τοποθετήστε την κατάλληλη ποσότητα αφαλατικών.
- 3 Πατήστε και κρατήστε πατημένο το κουμπί καφέ BREW ταυτόχρονα, χωρίς να το εκτελέσετε, συνδέστε το βύσμα.
- 4 Ενεργοποιήστε το διακόπτη και το φως του κουμπιού καφέ BREW, πατήστε το κουμπί καφέ BREW, ξεκινά η λειτουργία αφαλάτωσης, ο φόρτος εργασίας είναι 1 λίτρο νερού. Στη συνέχεια, πατήστε το κουμπί λειτουργίας για έξοδο από τη λειτουργία αφαλάτωσης.

! Προειδοποιήσεις

Όταν το μηχάνημα παράγει περισσότερα από 400 φλιτζάνια καφέ, θα πρέπει να καθαρίζεται τακτικά από άλατα σύμφωνα με την παραπάνω λειτουργία.

Κεφάλαιο 7: Άλλες λειτουργικές ρυθμίσεις

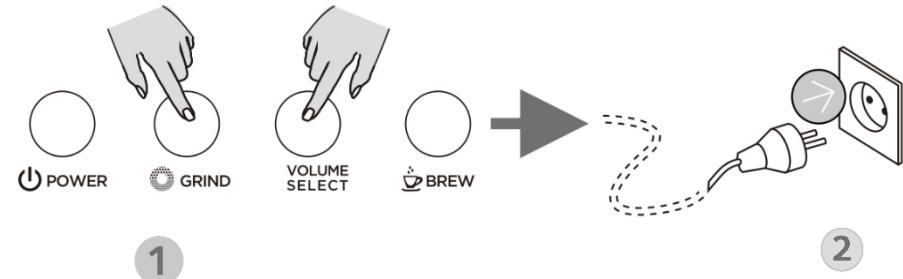

Ρύθμιση της λειτουργίας προπαρασκευής

Ταυτόχρονα πατήστε και κρατήστε πατημένο το κουμπί (GRIND) για άλεση κόκκων, (VOLUME SELECT) κουμπί για την επιλογή μεγέθους κυπέλλου, συνδέστε το στην πρίζα.

Πατήστε (VOLUME SELECT) για να απενεργοποιήσετε το κουμπί επιλογής μεγέθους φλιτζανιού. Η λειτουργία ζεστής παρασκευής ακυρώνεται

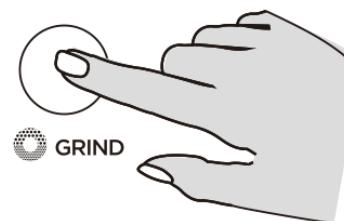

Πατήστε το κουμπί (VOLUME SELECT) για να επιλέξετε ένα μέγεθος κυπέλλου, ανάβει η ένδειξη. Ενεργοποιημένη η λειτουργία Hot Brew

Πατήστε ξανά το κουμπί λειτουργίας (POWER) για έξοδο από τη ρύθμιση λειτουργίας προετοιμασίας.

Ρύθμιση της λειτουργίας χρόνου άλεσης κόκκων

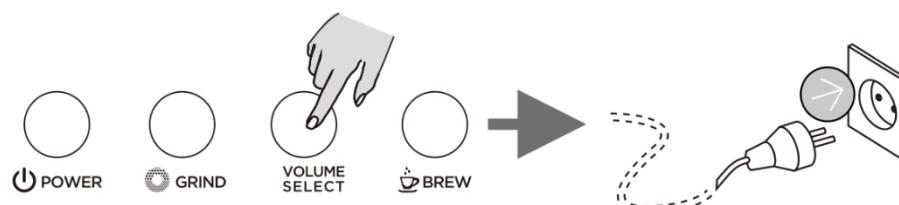

Πατήστε  **GRIND** παρατεταμένα την κατάσταση αναμονής, περιμένετε τον επιθυμητό χρόνο λείανσης και, στη συνέχεια, αφήστε το κουμπί, έχει ρυθμιστεί η λειτουργία χρόνου λείανσης. Ελάχιστο 9 δευτερόλεπτα, μέγιστο 20 δευτερόλεπτα.

Εργοστασιακών

Επαναφορά ρυθμίσεων

1. Πατήστε παρατεταμένα (ΕΠΙΛΟΓΗ ΕΝΤΑΣΗΣ) το κουμπί για να επιλέξετε την ένταση του κυπέλλου χωρίς να αφήσετε το χέρι σας, ενεργοποιήστε την τροφοδοσία, όλες οι ενδεικτικές λυχνίες αναβοσβήνουν δύο φορές, η επαναφορά εργοστασιακών ρυθμίσεων έχει ολοκληρωθεί.

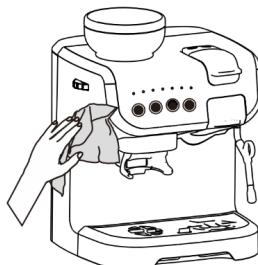

Κεφάλαιο 8: Καθαρισμός

Προσοχή.

- 1 Ποτέ μην βυθίζετε την καφετιέρα στο νερό.
2. Βεβαιωθείτε ότι το μηχάνημα έχει αποσυνδεθεί από την πρίζα πριν από τον καθαρισμό.
3. Μην χρησιμοποιείτε ισχυρά απορρυπαντικά, αιχμηρά αντικείμενα, βούρτσες ή άλλα αντικείμενα για να καθαρίσετε την καφετιέρα.

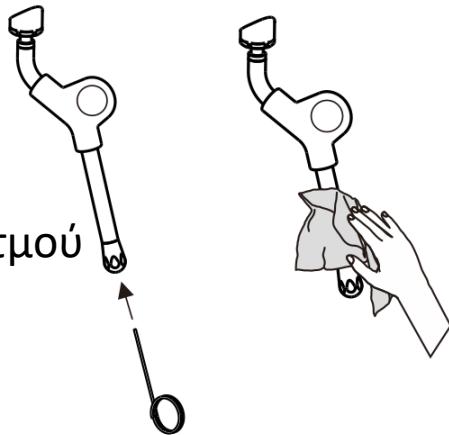

Καθαρισμός
ολόκληρου του
μηχανήματος

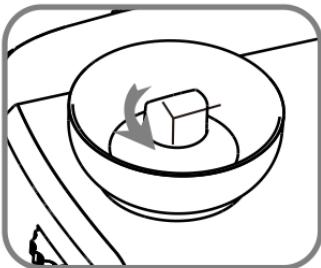

Καθαρισμός εξαρτημάτων

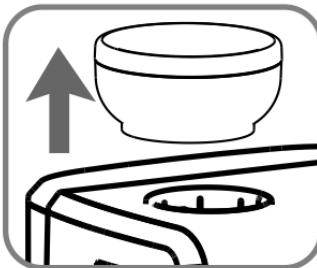

Καθαρισμός σωλήνων ατμού

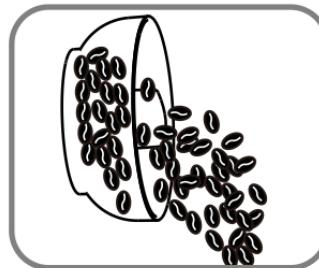

Καθαρισμός κουτιού κόκκων Ακολουθήστε τα παρακάτω βήματα για να καθαρίσετε το κουτί κόκκων.

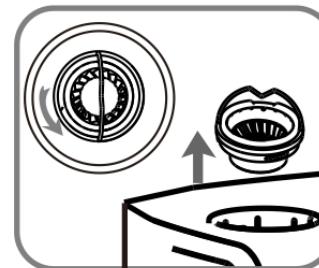

1. Ξεκλειδώστε το κουτί των κόκκων

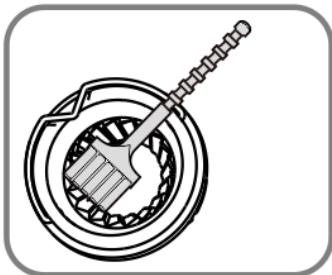

2. Αφαιρέστε το κουτί των κόκκων

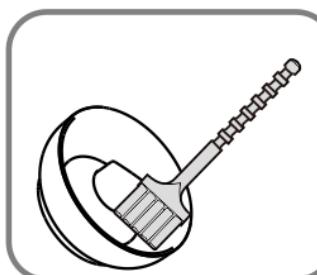

3. Αδειάστε το

4. Ξεκλειδώστε το μύλο αριστερόστροφα και σηκώστε το

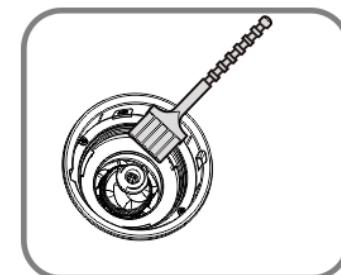

5. Καθαρίστε το μύλο με μια βούρτσα

6. Καθαρίστε το κουτί θηλών με μια βούρτσα

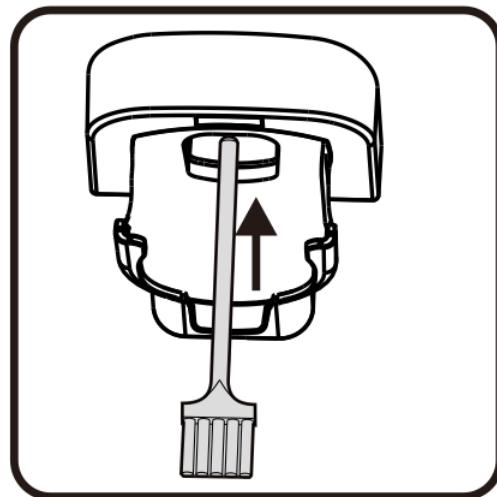

7. Καθαρίστε την οπή σκόνης με μια βούρτσα

8. Καθαρισμός μαχαιριών με βούρτσα

Έμφραξη

Η έξοδος για αλεσμένο καφέ εμποδίζεται λόγω διαφοράς στους κόκκους καφέ, ανεπαρκώς ξηρού ή ακατάλληλης λειτουργίας.
Ακολουθήστε τα βήματα καθαρισμού

2. Αφαιρέστε τη βούρτσα σκόνης για να καθαρίσετε το κανάλι εξόδου σκόνης

Solve the coffee powder blocking

1. Unlock the bean box.

2. Remove the bean box.

3. Pour out the excess coffee beans.

4. Unlock the grinder counterclockwise and take it out.

5. Clean the grinder with the brush.

6. Remove nut and gasket clockwise.

7. Clean the sharpener and wheel with the brush.

8. Clean the grinding chamber with the brush.

Κεφάλαιο ΙΧ: η μηχανή δεν βγαίνει από τη μέθοδο καθαρισμού του νερού

Προσοχή.

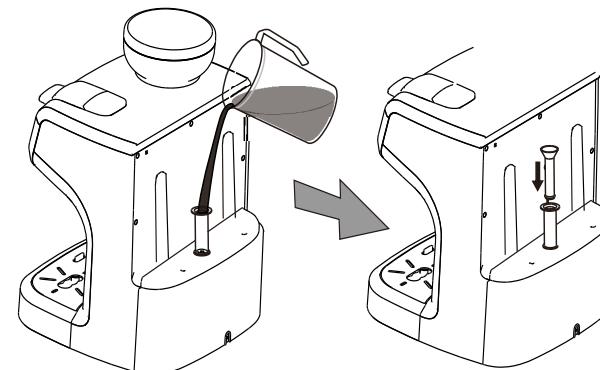

1. Πρώτη χρήση νέου μηχανήματος.
2. Παρατεταμένες περίοδοι μη χρήσης.
3. Έλλειψη νερού στη δεξαμενή νερού κατά τη λειτουργία.

Θα υπάρχει πιθανότητα το μηχάνημα να μην μπορεί να αντλήσει το νερο, υπάρχουν 2 τύποι λύσεων, βλέπε σχήμα (μέθοδος 1 / μέθοδος 2)

Γεμίστε το μηχάνημα με νερό χρησιμοποιώντας Αντλία "χειροκίνητης αντλίας" προσαρτημένη στο μηχάνημα.

Πατήστε παρατεταμένα το κουμπί ΤΡΟΦΟΔΟΣΙΑ ενώ το μηχάνημα βρίσκεται σε κατάσταση αναμονής.

Κεφάλαιο 10: Διασφαλίσεις

Απαγορεύεται να ρίχνετε απευθείας νερό στο μηχάνημα

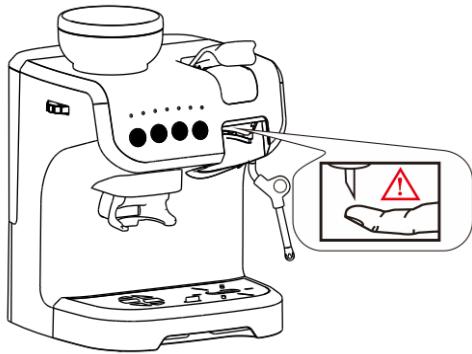

Προσοχή στη ζέστη.

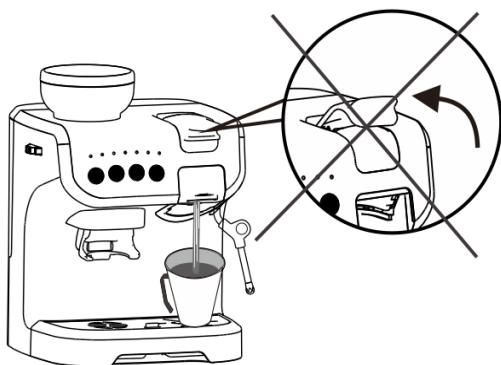

Ο βρασμένος καφές εξακολουθεί να φέρει μια μικρή ποσότητα υπολειμματική θερμότητα, δώστε προσοχή στην υψηλή θερμοκρασία

Αιχμηρό αντικείμενο στη θέση του
δοχείου ζυθοποιίας
Όταν αφαιρεθεί το κύπελλο ζυθοποιίας.
Μην Βάλτε τα χέρια σας στο μηχάνημα.

Απαγορεύεται το άνοιγμα της λαβής.
ενώ το μηχάνημα λειτουργεί

1. Βεβαιωθείτε ότι η κάψουλα καφέ ταιριάζει με το φλιτζάνι παρασκευής.

Βλάβη	Πιθανές αιτίες	Λύσεις
Η ενδεικτική λυχνία δεν ανάβει	1. Η τροφοδοσία δεν είναι συνδεδεμένη 2. Η λειτουργία δεν πατήθηκε	1. Ελέγχετε ότι το τροφοδοτικό είναι ενεργοποιημένο 2. Δεν πατήθηκε το κουμπί ενεργοποίησης/απενεργοποίησης. 3. Βεβαιωθείτε ότι η τροφοδοσία είναι σωστά ενεργοποιημένη και ότι η τροφοδοσία ταιριάζει σωστά, εάν το μηχάνημα εξακολουθεί να μην ξεκινά, αναζητήστε ένα εξουσιοδοτημένο κέντρο σέρβις
Διαρροή νερού ή διήθηση	1. Διαρροή δεξαμενής νερού 2. Διαρροές από το δοχείο παρασκευής	1. Ελέγχετε εάν η δεξαμενή νερού είναι στη θέση της ή δεν έχει υποστεί ζημιά 2. Συνδέστε το φλιτζάνι παρασκευής με την αντίστοιχη κάψουλα καφέ
Δεν ζεσταίνεται	Το κουμπί ΟΝ δεν λειτουργεί	Ελέγχετε εάν η πρίζα είναι ενεργοποιημένη, εάν δεν λειτουργεί, βρείτε επαγγελματική υποστήριξη
Το νερό ρέει από το κάτω μέρος της καφετιέρας	Υπάρχει πάρα πολύ νερό στο δοχείο για τη συλλογή περίσσειας νερού	Καθαρίστε το δίσκο Επισκευή από επαγγελματία
Ο καφές στάζει πολύ αργά ή δεν βγαίνει	. Ασυμφωνία κάψουλας καφέ	1. Βεβαιωθείτε ότι η κάψουλα καφέ ταιριάζει με το φλιτζάνι παρασκευής. 2. Καθαρίστε το κύπελλο παρασκευής εάν είναι φραγμένο.
